Our City comment & discussion

by
THOMAS D.
WATSON

Why Not
Tour Your
Own City
Before Going
Elsewhere?

WHEN you plan your next auto ride, why not make it a trip around Glendale?

Do you know that you can take a most enjoyable jaunt lasting for two or three hours and never leave this city?

Very few of the people who live here are really acquainted with the many wonders and the remarkable growth of Glendale. Why not let your tomorrow's auto ride be made in going the rounds of your home city?

Among the places we would suggest visiting is Patterson park, on West Patterson avenue. While there you will note how a picture of beauty and appeal is rising out of a sand heap; you will see the swimming pool where Glendallians, young and old, play during the summer months.

We would suggest that you visit the sections that are being opened up—the many wonderful and rapidly-selling subdivisions that are located in the various parts of this city.

Go out Broadway to Verdugo road, thence north on that road to Sycamore Canyon boulevard, which is soon to be improved. Turn east on Sycamore and note the many beautiful views that are obtainable from the hills of that section. Glendale Crest is located at the mouth of the canyon and a little farther on, up in Scholl canyon, is Glendolls, where hundreds of beautiful homesites have been laid out.

AFTER enjoying the most beautiful views of mountains and canyons, and the city of Glendale from the heights, return to Verdugo road and continue north. You will pass Rosemead on the right and left. This is the old Rose estate, which has been recently placed on the market.

Continuing north on Verdugo road you will come to Canada boulevard, branching to the left, which follows this takes you through the wonderful Verdugo Woodlands. At the end of this boulevard, branch over to and continue north along Verdugo road, reaching Sparr Heights a mile beyond. It is at this place that Glendale's first community center is located. This was donated to the city by the men who are laying out this section of Glendale.

On your return trip go south to Doran street, turning west. Visit Bellehurst, which was the old Thom estate, one of the landmarks of Glendale. After viewing this tract, go west to Brand and then north to Mountain street. Continue west on Mountain to Central, north to Kenneth road and out west on that road. Visit all the area of the northwest, which is one of the most popular residential sections of Glendale.

Return to Grand View and go south to San Fernando road. By turning south on that highway you may visit Glendale's industrial section, and further south on the right you will find Glen Angeles park and other subdivisions now being opened up.

CONTINUE south and visit the business district of southern Glendale, which is a thriving section. By turning north on Brand and east on Palmer you may visit several tracts that are now being opened up and many beautiful views may be obtained from the heights of that section.

Afterwards go north on Adams to Colorado street, west to Verdugo and north to Broadway, where the new high school plant is being erected.

After inspecting this plant, return to Glendale via Broadway. By this time the afternoon will have been pretty well spent and you will be in good condition to enjoy a hearty dinner. Also you will have a better knowledge of the wonderful progress Glendale has been and is making. This will make you a booster among boosters over this, our own city.

HIGH SCHOOL BASEBALL
ON MOYSE FIELD FRIDAY

The baseball game between twirlers of Citrus Union and Glendale High, staged on Moyse field Friday afternoon, proved a lively contest, affording plenty of diversion for the "thrilled" on-lookers, but Citrus won, the final score standing 6 to 8 in its favor. Today a good many of the players have gone to Occidental to witness a game there.

EGYPTIAN WORKS
AT THE LIBRARY

In connection with the popular course for things Egyptian, which has been arranged by the discovery of the tomb of "King Tut," Glendale, city librarian, is calling attention to the fine collection of works on Egypt and its civilization that she has placed on display in the library.

SO. CAL GAS CO. OPENS DOORS OF NEW HOME ON NORTH MARYLAND MONDAY

Thirteenth Anniversary of Completion of Transmission Lines and Piping of Supply to Glendale and Tropic

TOTAL OF 164 MILES OF MAINS ARE NOW IN

Growth of Company Operations in the District Requires Expansion of Accommodations for Immediate and Future Service Here

The Southern California Gas company will take possession of its new home, 124 North Maryland avenue, Monday morning, according to an announcement made this morning by S. C. Singer, manager of the San Fernando valley division of this concern.

Coincident with the completion of the Southern California Gas company's office building, the month of April also marks the month in 1910 in which the company completed the transmission line and distribution system which first supplied gas to the then small communities of Glendale and Tropic. The system, at that time, according to Mr. Singer, consisted of approximately five miles of main and supplied gas to 761 consumers. The gas was brought from the company's Los Angeles plant by a 6-inch transmission line some nine miles in length.

On January 1, 1915, the system had increased to forty-six miles of mains and 6,139 meters and at the present time there are 164 miles of distribution mains and 8,929 consumers in the city of Glendale. In the entire San Fernando Valley there is now a total of 164 miles of mains and 15,945 active consumers, an excellent indication of the tremendous growth of Glendale and surrounding territory during the last thirteen years.

Anticipating a continuance of this rapid expansion the company's new building has been designed to provide adequate facilities to meet the increasing demands for service. It is of brick and reinforced concrete construction erected at a cost of about \$45,000, and contains the business offices, a garage and repair shop and a large storeroom. The lobby is of tile and marble finish and the counters and wood work are of figured gum highly polished. The lobby also has space arranged for the display of the complete line of gas appliances carried by the company, another branch of Southern California Gas company "dependable service" which the company offers to its consumers.

Glendale will continue to be headquarters of the San Fernando Valley division, with S. C. Singer as division manager, and R. S. Cheatham as acting agent of the Glendale district.

The north front section of the building is taken up by an office for the clerical department, 30x60 feet in size. In connection with this office is the lobby, 20x40 feet. This is equipped with Batchelor tile fireplace.

There are adequate and modern rest and toilet rooms for both men and women. The south front side of the building is taken up by the stock and fixture room, testing room, etc.

Across the entire width of the building is the garage, 35x88 feet in size, which is for the storage of the company's machines, repair work, etc. Across the rear of the lot is the yard, around which is a concrete wall. This is equipped with a gas and oil building, for the company's machines.

Everything about the building is modern in the extreme. The structure is a credit to Glendale.

Receipts to Go to Philanthropy of the Local Organization

The Glendale Kiwanis club was entertained yesterday at its noon luncheon at the Tuesday Afternoon club by Nick Harris, famous detective, who gave a demonstration of the tactics used by underworld criminals in their unending career of crime and deception. He exhibited the box used by a criminal in a warehouse and after being rolled around during the day by truckmen proceeded to rob the place at night.

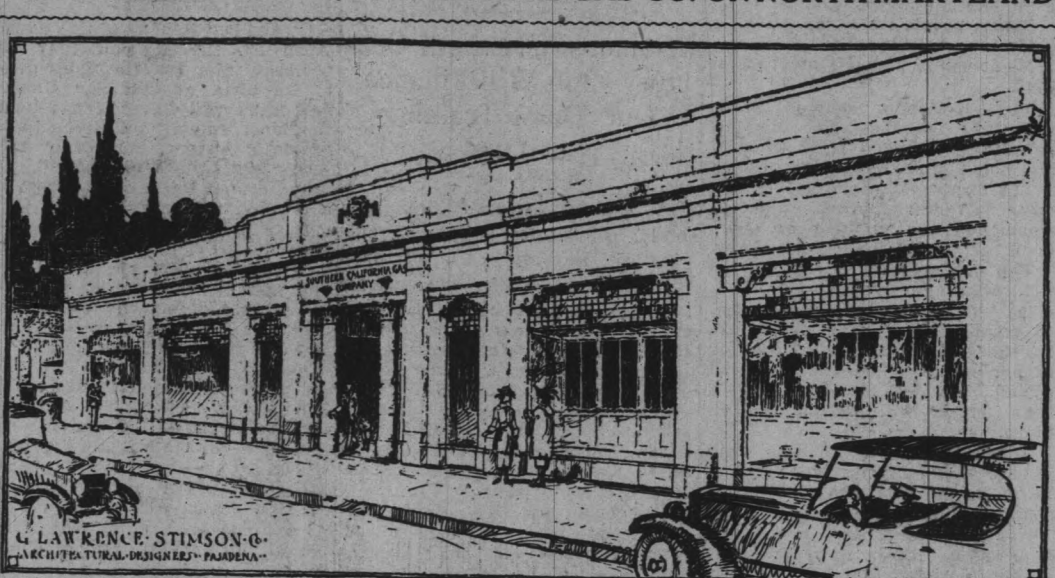

Splendid progress was reported on the Orpheus entertainment to be given at the Woman's clubhouse tonight. A few tickets remained to be sold, and the sum netted for the club to be used for helping underprivileged children and other good work being done by the Kiwanis, was a goodly amount.

The members were reminded that this is Kiwanis National Courtesy week—April 15-21—and were admonished to observe it.

"Day by day in every way the luncheon served by the ladies is getting better and better," might be truly applied to the dinner served yesterday to the Kiwanis; it was some fine dinner and the members thoroughly appreciated it.

Considerable routine business was transacted during the noon luncheon.

NEW HOME OF THE SO. CALIFORNIA GAS CO. ON NORTH MARYLAND

HOLLYWOOD WINS FROM GLENDALE

Sends Veteran Team for
Tryout for Southern
California Title

BRILLIANT ORATORY
Event Proves One of Best
Staged at the Local
High School

The debate between the team of Glendale High and that of Hollywood High, which was to determine entrance for the championship of the Southern California league, and which took place at Glendale High Friday evening, afforded some rather brilliant oratory and was one of the most interesting in which the school has participated. The honors went to Hollywood, which sent its most seasoned debaters, and they exerted their powers to the utmost in support of its affirmative on the question: "Resolved, That the United States Should Recognize the Present Mexican Government."

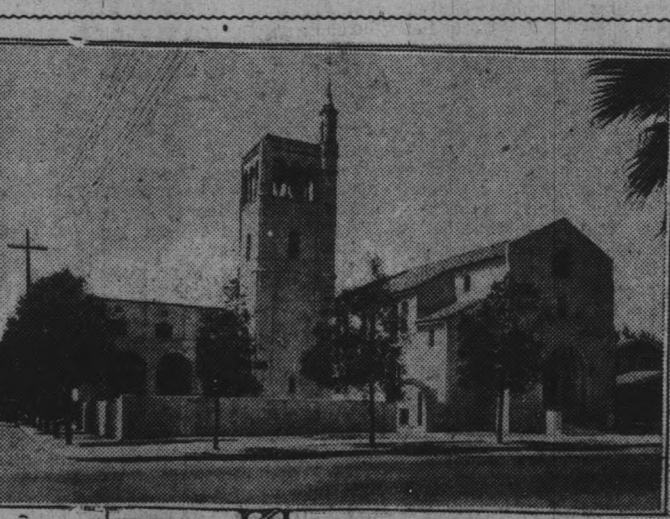

Glendale put up the finest argument, but its debaters were not veterans.

Serving as judges were Dr. Stetler of Occidental, Attorney Wendt of Los Angeles and Miss Clark of Van Nuys. The score stood 194 to 187 2-3 in favor of Hollywood, the winning team receiving the five additional points always awarded, giving them 199 points.

The debate was well attended, the auditorium being practically filled, with good rooting on both sides, the Hollywood team having been accompanied by a good delegation.

Glendale has been competing in two leagues and is now preparing for the championship debate of the Central league.

NEW CONGREGATIONAL CHURCH OF GLENDALE

Sunday will be one of the red letter days in the history of the First Congregational Church of this city because it will be the first time the beautiful new pipe organ just installed will be used.

The tonal resources of the organ are remarkably complete and effective. The individuality and sweetness of tone, in the different stops, the dignified power of the full organ and the perfect blending of tone are all special features of the voicing of the organ. Many of the solo stops will be notable. The Vox Humana is a stop wonderfully imitative of the human voice. The Echo Soliflora is a delicate and ethereal. The Dulciana is a soft, distant tone which almost melts away when the swell is closed. The Ovee and Tabla closely resemble the orchestral instruments.

The flute tones are represented by a number of beautiful stops variously shaded and the strings are characteristic. With the dignified

The Inaugural Jinks Is Announced by Elks for Monday Night

The annual inaugural Jinks party of Glendale lodge of Elks, No. 1289, will take place at the club rooms Monday night. This will be free to all Elks and only Elks will be admitted. Ray Galvin is chairman in charge of the program, which will include several boxing bouts and other surprise features. James Apple, newly installed exalter ruler, will preside at the business session, which will be held in short form, beginning at 7:30 o'clock. The program will start about 8:30. A special lunch will be served during the evening.

CARNATION LODGE TO INITIATE 20 ON TUESDAY

Discussion of Plans for
104th Anniversary Is
Scheduled

Next Tuesday evening Carnation Rebekah lodge will initiate twenty new members and aside from this important ceremonial it will be an important meeting because plans will be discussed for the 104th anniversary of Odd Fellowship to be held in this city April 23, which it is expected will draw an attendance of not less than 3500 visitors. It will be held in the Glendale City park with a program which will include interesting games and athletic contests, the day terminating with a ball.

Mrs. Loretta Schwitters, Noble Grand of the Carnation lodge, has been made general chairman, and Henry Hollenbeck heads the committee of entertainment. He will be assisted by D. A. Hall, and Carl W. Schwitters will be chairman of concessions.

Badges will be sold at 25c which will give all holders admission to the grounds from 10 a. m. to the ball in the evening. The proceeds to be used to defray the expense of the day's entertainment.

WEST COLORADO IS GIVEN "PUP" SHOWER

The "pup shower" is the latest social diversion.

A lady who lives at 230 West Colorado, and who refused to give her name, called the Glendale police yesterday, stating that a whole flock of pups had been left in her front yard the night previous by an unknown person.

These puppies are all colors and shapes. Some have pink eyes, others blue, but none of them have green eyes. They are just as dear as they can be, but they need a little mothering.

Officer Hobensack has taken charge of the infants.

Sanders Is Sold to Current History

Since his return from the conference of secretaries of chambers of commerce, held last Saturday, Secretary Sanders says he is absolutely committed to the policy of current history of the chamber of commerce rather than the ancient history represented by the standard annual report which it is expensive to publish, which few will read and none fully understand.

He indicated that would be the policy followed in connection with the Glendale chamber which will use the newspapers of the city to inform its members and the public generally of the undertakings of the organization and the work performed to the end that all may be kept in touch with the activities of the body through its committees and otherwise.

THE WEATHER

San Francisco: Fair tonight; Sunday, increasing cloudiness, followed by unsettled threatening weather by afternoon or night; winds becoming southwesterly. Sacramento Valley: Fair tonight; Sunday, increasing cloudiness, followed by rain north portion; cooler Sunday; moderate southerly winds. Santa Clara Valley: Fair tonight and Sunday; gentle variable winds. Southern California: Unsettled and occasionally threatening weather tonight and Sunday; moderate westerly winds.

CALL MASS MEETING TO PAVE AVENUE

Advancement Committee
Seeks Glendale Property
Owners' Ideas

Representatives of All
Kinds of Pavement to
Be Present

The paving committee of the Glendale Advancement association has called a mass meeting of all the property owners on Glendale avenue for Wednesday, April 18, at 7:30 o'clock, the purpose of the meeting being to consider the type of paving to be laid on that thoroughfare. The committee is desirous of bringing to the attention of the parties concerned in the paving of that street, knowledge of the various types of paving and the cost of laying same to the end that Glendale avenue shall be the best paved street in Glendale.

Speakers representing the different paving companies will be present to enlighten the property owners on the merits of their respective types of material. The city council has ordered the street paved with 6 inches of concrete, but the property owners are divided in opinion as to the wearing qualities and the cost of same. It is to clear up this matter and to get an expression from all those concerned that this meeting has been called.

SOUTHERN PACIFIC URGED TO MOVE DEPOT CLOSER

The Announced Site Is
Considered Too Far
for Service

An effort will be made today by a number of men from the Glendale chamber of commerce and city officials to persuade the officials of the Southern Pacific company to construct its proposed station several hundred feet closer to the Pacific Electric tracks than that company proposes to place it. This committee which is meeting today with Mr. Williams, assistant general manager of the Southern Pacific, consists of Mayor Robinson, City Manager Reeves, Secretary Sanders of the chamber of commerce, Roy Kent, C. D. Lusk, Mr. Wilson, Dr. A. H. Parker and members of the depot committee of the Glendale chamber of commerce.

It is the declared intention of the Southern Pacific company to construct this new depot on the company's strip of land north of its tracks and a short distance west of the Glendale points, close to the Central avenue and the Southern Pacific's land intersect. This will be several hundred feet farther away from the Pacific Electric than is the present station.

The present depot is too far from Brand boulevard for it to be practical for passengers arriving in

PHYSICIANS' CLUB MEETS AT HIGH

The Physicians' Club of Glendale, of which Dr. F. M. Rossiter is president, had a meeting of unusual interest in the music room of the High School Thursday night when it was addressed by Dr. G. Edgerly Carter of Los Angeles, president of the Pediatric Society of Los Angeles, and a child specialist. His discourse dealt with dietetic deficiencies resulting from modern methods, and was followed by lively discussion. About thirty were present.

FOOTHILL FOLKS TO HOLD MEETING

A joint meeting of the Grandview P. T. A. and the Foothill Improvement Association, has been called for Monday night at the Grandview School at 8 o'clock to plan for the community party and bonfire to be held on the school grounds during National Play Week. — Mrs. Mary Wheldon, Grandview P. T. A. secretary; Mrs. Myrtle Buckman, secretary of Foothill Improvement Association.

GLEN EYRIE HAS RECORD ATTENDANCE MUSIC FOLKS MARK DAY OF FEDERATION

200 Members and Visitors
Attend Get-together
Party

DEP. GRAND IS GUEST
MRS. JONES PRESIDES

Mrs. Orma Naudain Appointed Chairman of By-Laws Committee

An unusually large attendance of about 200 members and visitors attended the regular meeting and get-acquainted party of Glen Eyrie Chapter, Order of the Eastern Star, held last night at Masonic Temple. Miss Mildred Lyon, worthy matron, was in charge of the business session, at which time nine applications for membership were balloted on. There were a large number of visitors present from Eagle Rock and other nearby communities.

District Deputy Grand Matron Irene Trunkle, who is past matron of Highland Park chapter, was a guest and gave a talk.

Mrs. Orma Naudain was appointed chairman of a committee to consider changing the bylaws of the chapter. Following the business session the meeting was turned over to Mrs. A. W. Tower, past matron of Glen Eyrie, who had arranged a number of get-acquainted games. After the program the members formed in line, headed by Mae Warrick, marshal, and Martha Dibley, conductress, and other officers of the chapter, who had as their partners the newly elected candidates, followed by the past matrons and patrons escorting the local chapter, and adjourned to the banquet room. The tables had been artistically decorated with Cecil Brunner and red roses. Mrs. Anna Fife was chairman of the refreshment committee, which also included Jessie Elizabeth Taylor, Edith Pearl, Catharine Kate Cronkrite and William Kulp, who served pie a la mode and coffee.

Announcement was made of the annual Eastern Star ball to be given by Glen Eyrie at the Temple on Saturday, April 21. Invitations are being mailed by the secretary to the members. Mrs. Grumblin, past patron, will be chairman of the committee in charge, and will be assisted by the star points.

The next meeting of Glen Eyrie Social Club will be held Wednesday with Mrs. Kinch, 328 North Brand boulevard. Those planning to attend should notify her by Monday. Mrs. James Jones, president of the club, requests that all members bring their crochet needles.

"Hearty greetings. Regret not being able to be with you. Congratulations upon your splendid achievements. Make every effort to send delegates to national biennial in June. California must have large representation. Am depending upon your co-operation."

One of the big things which the members of the music section has undertaken this year is the purchase of the Knabe piano for the club auditorium. Mrs. Roberts, curator, received the following letter in regard to this gift:

"Please thank the members of the music section in behalf of all of the club membership for the beautiful new piano you are furnishing. It is a gift that will mean so much to the entire club for all time that we know your section has the appreciation of every club member for helping in such a generous way."

(Signed) Mrs. Frank Ayars, Corresponding secretary of the Tuesday Afternoon club.

Announcement was made of the three o'clock play to be presented by the drama section at the club auditorium on April 27 and 28.

The meeting was then turned over to Mrs. Jones, who told of the various musical organizations of the city who are members of the music federation. The music section is a charter member of the federation. She spoke particularly of the splendid co-operation of the section and the Glendale Music club and of the purpose of the musical organizations in Glendale to uphold American music and American artists. Mrs. Jones also told of the federation work among the junior and juvenile clubs, and introduced Mrs. Ella Duffield, associate chairman of junior music clubs for the state federation, and chairman of the juvenile section of the Wa-Wan club of Los Angeles. Mrs. Duffield told of her work and also extended an invitation to have a Glendale delegation contribute programs several times a month for the children's hour between 6:45 p. m. and 7:30 p. m. from radio broadcasting station at Los Angeles.

Mrs. Rigidon, who is one of the senior directors of the junior auxiliary of the Glendale Music club, and Mrs. Frank Arnold, who was one of the original directors of the juvenile auxiliary, told of the work being done in these two supplementary organizations.

The musical program for the afternoon included a group of two original compositions by Mrs. Duffield, "If I Were a Sunbeam," and "Dutch Lullaby." Miss Lois Welch, member of the junior auxiliary, played two very charming harp solos, "Prayer" and "The Dance"

(Continued on Page 2)

Tuesday Club Section Observes Anniversary at Regular Meeting

Reports Read on Work of Various Musical Organizations of City

Federation day was observed at the regular meeting of the music section of the Tuesday Afternoon club held yesterday at the home of Mrs. Nathan Rigidon, 224 West Doran street, with Mrs. Eva Cunningham, Mrs. A. M. Draper and Mrs. H. L. Baker as assisting hostesses. The program was in charge of Mrs. Mattison B. Jones, who organized the music section, and was preceded by a short business session in charge of the curator, Mrs. Warren Roberts.

Announcement was made that the next meeting on April 27, will be in charge of Mrs. Eva Cunningham. Vernon Spencer of Los Angeles is to be the speaker and will give an educational lecture on some phase of music. The place of meeting and subject will be announced later. Each member of the section is invited to bring a friend, for which a fee of 50 cents will be charged. Mrs. A. D. Dunlop gave a very interesting account of the convention at Santa Ana recently of the district federation of music clubs, at which the report of the work accomplished in Glendale during the past year was presented.

Mrs. Mildred R. Meadows, secretary of the music section of the Tuesday Afternoon club, is in receipt of the following telegram from Mrs. Cecil Frankel, junior past president of the state federation of music clubs:

"Hearty greetings. Regret not being able to be with you. Congratulations upon your splendid achievements. Make every effort to send delegates to national biennial in June. California must have large representation. Am depending upon your co-operation."

One of the big things which the members of the music section has undertaken this year is the purchase of the Knabe piano for the club auditorium. Mrs. Roberts, curator, received the following letter in regard to this gift:

"Please thank the members of the music section in behalf of all of the club membership for the beautiful new piano you are furnishing. NEWS OF EAGLE ROCK CITY

LOCAL REALTORS J. B. BROWN & CO. REQUEST PERMIT OFFICE HERE TAKES OUT 8 PERMITS

Resolution Will Be Sent to L. A. Council for Sub-station Here

Moved by C. W. Hunt, seconded by C. W. Young, the following resolution was passed at the realty board meeting Thursday night:

WHEREAS, the citizens of Eagle Rock at an election held March 27, 1923, expressed their desire to consolidate with the city of Los Angeles, and,

WHEREAS, this consolidation means a change in the various municipal offices and arrangements and,

WHEREAS, a continued and increasing activity in home building in this vicinity requires local service in the matter of obtaining permits and inspections for building purposes, BE IT RESOLVED, by the Eagle Rock Realty Board at a session at the city hall, this 12th day of April, 1923, that we call upon the Los Angeles Building Department, through its chief, Mr. J. J. Backus, to establish or appoint deputies or assistants at Eagle Rock for the purpose of issuing building permits and for furnishing inspection service for the same.

BE IT FURTHER RESOLVED, that it is our desire to co-operate with Los Angeles in all its departments in making of Eagle Rock a section of which Los Angeles will be proud.

BE IT FURTHER RESOLVED, that a copy of this resolution be forwarded to the Los Angeles city council, the Eagle Rock board of trustees, and to the Press, and that it be read in the minutes of the board.

Other matters of interest to property owners were taken up at this meeting. It was moved by W. L. Woodhouse, seconded by C. W. Young, that the president of the realty board act as chairman to select a committee to confer with the chamber of commerce, and that the results of this conference be taken up with the Los Angeles planning commission. The matter of zone is considered of vital importance now that changes are in prospect as the result of annexation. The committee appointed consists of Mr. Woodhouse, Mr. Young, Mr. Jones and J. B. Brown. It was also moved by C. W. Young that a resolution be passed regarding the cut of the allowance to the state realty commission for realty work, and asking the governor of the state, Friend W. Richardson to make a more plentiful consideration owing to the fact that the allotted \$74,000 does not even cover the amount of licenses paid in.

A copy of this resolution will be sent to Governor Richardson.

TWO WEEKS' COURT CASES ARE LISTED FOR TODAY

Judge Cruzan found before him a busy session in the local court this morning, as one of the longest lists of cases ever slated for one session was ready for him. About thirty-six of the cases listed were on traffic violation charges, and the other nine or ten referred to small claims.

Young Musicians Appear On L. A. Radio Program

Several of the younger musicians of Eagle Rock distinguished themselves this week by appearing on the radio program of Anthony Station, K. F. L., during the children's hour. They are all pupils of Mrs. Constance Branch, and interpreted difficult selections. Those who played were Lillian Gregory, Nancy Hunt and Olga Griffin.

EAGLE ROCK WEEKLY CALENDAR

SUNDAY, APRIL 15
Regular services at all Eagle Rock churches.

Eagle Rock Churches

CONGREGATIONAL
E. Morgan Isaac, Pastor
Morning worship, 11.
Sunday school, 9:30.
Young people's meeting, 6:30.
Evening worship, 7:30.
Wednesday, people's meeting at 7:45.

"A live Sunday school" is the term that describes the school under the direction of Mrs. Arbogast and her splendid corps of workers. The large vested chorus has met with universal approval, and the commendations we hear on every hand only speak of its excellence. The subject at 8 p. m. will be "The Courage to Forget." It is what we forget that often makes us great. Many people are ruled by the things that they insist on remembering. Life is a great school. Our teachers are many. A song service will precede the address.

"The Seasons of the Soul" will be the theme Sunday morning at 11. Like the year, the soul has its seasons. There are times of great joy, and times of deep agony and depression. Again there are days of bewilderment and days of wonderment. Great questions come of the unseen and torment us. Strange emotions trouble us. Surely the soul has marvelous powers and capacities.

METHODIST CHURCH
Rev. E. J. Bradner, Pastor
Sunday school at 9:45 a. m.
Morning worship at 11 a. m.
Evening service at 7:30.
Epworth League at 6:30.
Prayer meeting, Wednesday, 8 p. m.

The Sunday school has increased 50 per cent the past three months. Come out and join one of those new classes being formed almost every Sunday.

In the near future the Church night for Wednesday mid-week services will be resumed. But for the present the old order obtains, with song service at 7:30, address by the pastor, prayer and testimonies. Nearly all persons are afraid of somebody or something. They are afraid of disease, death, or that they will lose their jobs, etc. "The Conquest of Fear" will be the pastor's theme Sunday at 7:30. Come and bring your pet worry.

Next Sunday morning the pastor will preach on "The Swifts and the Love." Last Sunday both Dr. John Headly and Dr. W. T. Gilliland were present. Dr. Headly has been transferred to Berkeley, Cal., and is now in charge of the Chinese work on the Pacific Coast. He will return and preach in the local Methodist church on July 8.

CHURCH OF CHRIST
130 Valley Drive
W. J. Carry, Minister.

LORD'S DAY
Bible school, 10 a. m.

Preaching, 11:15 a. m. and 7:30 p. m.
Christian Endeavor, 6:45 p. m.
Ladies' Meeting, 3 to 5 p. m., Thursday.
Prayer Meeting, Thursday, 7:30 p. m.

Subjects for sermons Sunday: In the morning, "Methods of Personal Evangelism." In the evening, "Those Forty Days."

OCCIDENTAL UNITED PRESBYTERIAN CHURCH
Corner York Boulevard and Glassell Avenue

Invites those who have as yet no church home to worship God with its members. The Bible school expects to pass the hundred mark at 10 o'clock. It only lacked two of doing it last Sunday when it was but two months old.

The pastor, J. G. Kennedy, will speak at 11 o'clock on "The Heart of the Good News," and at 7:30 p. m. on "Being Rich Toward God." The Y. P. S. C. E. will be glad to see you at 6:30.

Test our Welcome.

PRESBYTERIAN CHURCH
B. B. Weatherall, Minister.
Sunday school at 9:30 a. m.
Morning worship, 11 a. m.
Evening service, 7:30.

Prayer meeting, Wednesday, 7:30 p. m.
Intermediate Y. P. S. C. E., 6:15 p. m.
Senior Y. P. S. C. E., 6:15 p. m.
Dr. Blue will preach next Sunday morning and evening.

CATHOLIC CHURCH
Change of Time for Services
Sunday masses at 8 and 10 o'clock.
Sunday school at 9 o'clock.

FIRST CHURCH OF CHRIST SCIENTIST
Sunday school, 9:45 a. m.
Sunday services, 11 a. m.
Wednesday, 8:00 p. m.
Women's clubhouse, corner Colorado and Keilworth.

Reading room at Ritchey building, 116 East Colorado boulevard. Hours from 12 to 4, except Sundays and holidays.

BIBLE STUDY CLUB
The Eagle Rock Bible Study club meets every Monday afternoon at the home of Mrs. F. Hoffelder, 206 North Central avenue. Hour, 2:30. Teacher, Mrs. David Cant.

KEEP WELL AFTER YOU GET WELL. Dr. A. H. Merrill, Chiropractor, will tell you the secret. Give him a fair trial. Call afternoons at 118 South Saturna, Eagle Rock. Phone Garyana 163. Adv.

Ermine the Vogue. The use of ermine on frocks, hats and suits is conspicuous in window displays.

EAGLE ROCK GIRL TO WIN HONOR SCHOLARSHIP

Woman's Twentieth-Century Club Will Finance One Year's Training at Oxy

An honor scholarship at Occidental college for a term of one year will be bestowed upon some fortunate and worthy Eagle Rock girl by the Twentieth Century club in June. Any young lady in Eagle Rock whose name is sent in to the committee in charge of the scholarship fund will be considered in the choice. Character, scholarship, ability, educational interest, and general worthiness will be taken into consideration in making the decision.

The club members themselves are more than enthusiastic in their new project. Mrs. Cruzan, who is chairman of the scholarship fund committee, states that it is one of the most interesting things that the club has yet undertaken, an experiment in shaping the life of some worthy young person to bigger accomplishments, an opportunity for which someone perhaps longs, to develop natural talents for something big in life. All those who are devoted to this work will feel a deep and lasting interest in the work of the young lady whom they select to spend this year at college. She will find many friends in the club members.

On Friday, the 27th of April, the first of a series of entertainments for the benefit of the scholarship fund will be presented in the Woman's club house. The Occidental Women's Glee club will give a splendid musical program, presenting several feature numbers. All the Eagle Rock girls attending the junior and senior years in high school will be the special guests of the club on this occasion. Admission will be 50 cents. "The committee in charge of this work is: Mrs. Harold Lee Cruzan, chairman; Mrs. C. W. Young, Mrs. Sherrill Osborne, Mrs. Mary Fiske, Mrs. F. M. Lang, Mrs. Larson, Mrs. M. T. Lee, Mrs. Purcell, Mrs. Blanche Gardiner, Mrs. Humphrey Marshall, Mrs. Elmer Richardson, and Mrs. H. G. Shearin.

TERM 'REALTORS' FOR MEMBERS ONLY

The local realty board has received a communication from the National Association of Realty Boards requesting that they be advised of any firm in this locality which is making use of the term "Realtor" either through press advertising, window signs, billboards, or in any other manner whatever. The association has the proprietary rights to this term, as it is a patented designation, and only members of the national and local boards have the right to use it. Not only those infringing on the rights of the national association in this matter be forced to destroy such advertising, but a fine can also be imposed for the continued encroachment upon the patented rights of those entitled to use this term.

MISS AMBER YOUNG IS MAID OF HONOR AT WEDDING

Miss Amber Young, daughter of Mr. and Mrs. C. W. Young, 900 Rock Glen, was maid of honor at a beautiful church wedding which took place in the Methodist Church at Huntington Park on Thursday morning. The bride, Ethel Wagner, daughter of Mrs. Herman Wagner, of Huntington Park, has been a close friend and classmate of Miss Amber Young at the Southern Branch of the University of California. The groom, Alvah Hubbard, who is secretary of the San Francisco Chamber of Commerce, was called to make a sudden trip to Mexico City, so the wedding which was set for sometime in August was hastened, and Mr. Hubbard and Miss Wagner were married Thursday.

Twentieth Century Club Forms Dramatic Section

A dramatic section has been formed in the Twentieth Century club, with Mrs. Elgie Lowery Fischer, prominent in Pasadena and Eagle Rock dramatic circles, as director. This unit will take up the study of the drama, reading the plays of the better writers, and discussing current productions of merit. From time to time plays will be presented by the club members. Mrs. J. B. Squire is chairman, and Mrs. Van Lee Hood, secretary of the new department.

Mrs. Constance Braasch, husband and family, will be dinner guests of old friends from Minneapolis who are wintering in Los Angeles, tonight.

MISSION PLAY TO HAVE TWELFTH ANNIVERSARY

Celebration to Begin April Twenty-ninth at San Gabriel

On the last Sunday of this month, April 29, the Mission Play will celebrate the twelfth anniversary of its birth at Old San Gabriel. And thus will have been reached the most shining milestone in all dramatic history, ancient or modern. All things considered, no other drama has even approached a record so remarkable.

Anticipating the great occasion, the day previous, Saturday, April 28, will be observed as "History and Landmarks Day," at the Play, by a great outpouring of the Play and Landmarks sections and the Art and Travel sections of the Women's Clubs of Southern California at the initiative of Los Angeles Ebell. There will be luncheon under the Old Grapevine—the mother of all the Mission vineyards of California—from 12 to 1 o'clock, after which the magnificent new Mission Playhouse will be viewed. At 1 o'clock the ladies will assemble in the ancient Mission church to hear an historical address by John Steven McGroarty, adjourning in time to witness the pre-anniversary performance of the Play.

The attendance at the Mission Play continues this season to be greater than ever before. Large special parties from clubs, schools, churches, lodges and commercial establishments attend every performance. Matinees are given except Monday, and evening performances are given also each Wednesday and Saturday.

MUSIC FOLKS MARK DAY OF FEDERATION

(Continued from Page 1)

of the "Gnomes." Little Marguerite Chappell, pupil of Mrs. Cunningham, and member of the juvenile auxiliary, delighted the members with two piano solos, "Sextette From Lucia," and "Songsters on the Bough" (Heim).

Mrs. C. A. Parker, member of the music department of the high school, told of the work of the boys and girls glee clubs and of the program being planned by them for the near future. She also told of the next concert of the Madrigal club, which will probably be held on May 17. Announcement was made of a benefit concert to be given for Miss Linkogel, one of Glendale's most promising young artists, to enable her to accept a scholarship with a prominent Chicago teacher.

Delicious refreshments were served at the close of the afternoon by the hostesses. There were over fifty members and guests present.

SOUTHER PACIFIC URGED TO MOVE DEPOT CLOSER

(Continued from Page 1)

Glendale over the Southern Pacific to go to nearby points over the Pacific Electric. As this is one of the vital points that should be considered in connection with the location of the new station, the men who will appear before the Southern Pacific officials today believe that it is absolutely necessary that the station be located at a point close to Brand.

The Southern Pacific, it is understood, would be glad to erect the station close to Brand, if it were not for the fact that to do so would necessitate the purchase of a piece of ground approximately 50x150 feet in size located between the company's property and Brand. For this piece the owner is asking \$10,000. This price, the company feels, is unreasonably high.

It is to endeavor to iron out this difficult situation that the Glendale men are now in Los Angeles.

REPUBLICAN PLOT FOUND IN LONDON

[By Associated Press]
LONDON, April 14.—Documents revealing plots involving the destruction of life and property in London are reported to have come into possession of Scotland Yard as the result of last night's raid on the residences or resorts of Irish men and women suspected of being Republican supporters.

Among the plans said to have been revealed were plots to attack London's lighting and power stations, efforts to release Irish prisoners from London prisons and projected attempts on the lives of high police officials.

It is said that the plots had huge ramifications in Great Britain and particularly in London and had reached such a stage that a delay of a week by the police might have resulted in the scheme being put into operation. Among the plans was one for attacking police officers in their houses.

A prominent former cabinet minister is declared to have been marked for attack. There was a well organized scheme, it is asserted, to raid a certain London prison, either for the purpose of damaging it or for rescuing Irishmen detained there. Irish prisoners also were to be rescued from prison vans while being conveyed through London.

Preparations had been made for some sort of an attack on the old Bailey Court and the underground power stations had been marked for destruction.

A hot spring—jumping from the trying pan into the fire.

Urges U. S. to Enter League of Nations

Lord Robert Cecil

Lord Robert Cecil, noted British statesman, is visiting the United States in an effort to have the country enter the League of Nations, declaring that is the only solution of world problems.

One of Judge's prize stories is as follows: An old southern planter (once "Marse Davy") said to an old negro, "Well, Tony, this is our birthday again—75 years we've been together as man and boy; three-quarters of a century, and on one plantation." "So nuff it is, boss—and 'pears lak dese here years is a travelling aroun' a heap 'orter dan dey uster." "That's what's on my mind, Tony, and in the course of events we can't expect to remain here much longer—so I've been thinking seriously, Tony—seriously—about the grave and the hereafter." "Walate dat, boss?" "Well, I want to make a bargain with you, Tony, a solemn bargain, to this effect. Whichever one goes first, he will come back from the spirit world and tell the other one just what it looks like over there." "Dat's a bargain, sah. Dat suits me adzactly. But"—reflectively—"but, Marse Davy, if you goes first, won't you come back in de day time?"

CHILD'S HAND IS MANGLED WHILE AT PLAY

(Continued from Page 1)

block, his little hands dripping with his side.

A. J. Porter of 3244 La Clede avenue saw the plight of the lad and hurried to his relief. After trying up the boy's arms in such a way as to stop the flow of blood as much as possible, Mr. Porter hurried with the little fellow to the office of Dr. T. O. Young, who took him immediately to the Research hospital. Officer Royle hurried to the Bergstrum home and took Mrs. Bergstrum to the bedside of her child.

The bravery exhibited by the lad proved a wonder to all who saw him, in his terrible plight. With his hands broken and bleeding profusely, he had walked a whole block before he was afforded assistance. Not a tear did he shed in all his trouble. Miss Bessie Mock, secretary at the hospital, stated this morning that when the boy entered that institution there was not a trace of a tear on his cheeks. His mind, was clear. He told the attending nurses where he lived, his telephone number and all the details of the accident.

When Mrs. Bergstrum arrived at his bedside the lad greeted her with a smile and told her also how the trouble occurred. Upon being taken to the hospital by Dr. Young he looked down at his blood-covered arms and said:

"I guess they'll have to cut my hands off."

But Billy's hands will not have to come off. They will be crippled for life, it is true, but he will not be helpless.

The lad is smiling this morning. His wounds are terribly painful, but that brave little grin now and then forces its way through.

"That's what you call 'Smilin' Thru'."

GIRL DRIVES BANDIT CAR
A bandit gang riding in a touring car with a well dressed young woman at the wheel, staged two coal office robberies in Chicago, within twenty minutes. The loot totaled \$577.60.

APPLY WATER INSIDE
When cleaning mud and other dirt from the coils of the radiator, apply a stream of water from the hose, only from the inside of the hood, and not from the outside.

EDITORIAL PAGE OF THE DAILY PRESS

Truths in Epigram

No cord or cable can draw so fast as love can do with only a single thread—Bacon.

Make not a bosom friend of a melancholy soul—Fuller.

The spirit should not grow old—Garfield.

Death? Translated into the heavenly tongue that means life—Beecher.

ASLEEP AT THE WHEEL

The facts brought out at the trial of an automobile driver charged with homicide were unusual. He had run down and fatally injured a pedestrian. At the time of the accident he was asleep. He had been overcome by weariness because for several days he had been working eighteen hours daily. The defendant was acquitted, the jury finding that he had not been at fault. Be this as it may, somebody was at fault.

No man has the right, save in some sudden emergency, to work eighteen hours a day. Human strength will not long endure such a strain. In the brief time devoted to rest the body has no chance to recuperate, or the mind to become clear. A person working under such conditions, may from force of habit, go through the essential motions, but all his perception is befuddled. He is as one in a dream. If sleep overtakes him, he is helpless to resist it. Therefore his activity is a menace to himself and to the public, and should be inhibited.

There is no trade or calling that demands an eighteen-hour work day. If there were, it quickly would be forced by law to adopt a new schedule. Men could not be found to engage in it for any wage. No reward it might proffer could be worth the sacrifice. The defendant, in the case cited, said he had been working eighteen hours a day. It is not of record that he explained why he had done so, or that some one other than himself was responsible. Whoever caused so severe a task to be put upon him, probably will have a hard time to clear himself to his own conscience of culpability for the death of the pedestrian run down by the sleeper.

FIVE TO THREE

The supreme court has just decided an important question on which the tribunal was divided, five to three, with one member absent. That such division, or any division, should be possible, is a matter for regret. It would be comforting to be able to regard law as being as exact as science, and the interpretation of the statutes something to be accomplished with mathematical precision. Conscience quickly recognizes right from wrong; tells which of two courses would be just. In theory at least, law is to uphold justice. In a given set of facts, calling for action, there must be a right and a wrong course. It is the office of the law to point to the distinction. Evidently it does not invariably point with accuracy. It leaves decision to individuals, and individuals cling to their own conceptions. In the absence of unanimity among members of a high court, the dissenters are as able to present strong arguments in support of their view as are presented by the other side. The change of a vote or two, and the majority would become a minority; then the present opinion of the supreme court would cease to be more than the ineffective opinion of a minority.

One refrains from adverse criticism of the supreme court, for more than a single reason. In the first place the men on the supreme bench are believed to be upright, to be unprejudiced, and to have such knowledge of the constitution as the ordinary citizen could not presume to claim. At the same time there comes now and then a decision that surprises, overturning a law that had been deemed sound, and had been beneficial in its operation. That measures taken to regulate child labor, for example, or minimum wages, are unconstitutional, is the decree of the supreme court. At the same time that citizens acquiesce in the ruling, for they are law-abiding, they still respect the principles of the discarded laws. They hope that it may be possible to embody these same principles in some measure that will withstand the test.

THE LEGACY OF FAME

Young Theodore Roosevelt is said to have declared that he "won't be put on the shelf" by accepting the nomination to the vice presidency. This recalls the attitude of his distinguished father, who objected strenuously to such treatment of himself. But the father could not have been shelved. No vice presidential tradition could have robbed him of initiative. It happened, tragically enough, that the position he had not desired, led to the highest office. He was elected subsequently, ending the possibility of being known in history as an accidental president.

To the country at large the present Theodore Roosevelt is unknown, save as there has descended to him the legacy of fame. His personality is accentuated by the identity of name. Nevertheless, in general a man must stand or fall on his own merits. He is not to be judged by the record of his father. The son of a famous father does run true to form in instances, but not frequently; in truth, but rarely. Even when he is destined to do this, he is not accepted in advance. It is up to him to prove himself. Young Roosevelt went into the army, and made a good record. So did many another American, who after the making of the good record, settled back into private life, his goings and his comings unheralded. A question naturally arises as to whether the publicity attaching to Theodore Roosevelt is because of achievement, because of known ability, or because of relationship with the great.

All this is said in the kindest of spirit. The Theodore of today may arrive at the height of accomplishment and repute reached by the Theodore of yesterday. But it seemed a little early for him to be declining high office, not yet tendered, and declining on the tacit averment that the place is not worthy of him.

Slow wisdom is sometimes better than sudden inspiration.

Doubtless the people of Pasadena appreciate the support of Los Angeles in relation to the 1924 convention of the California Real Estate association. The smaller city long ago made known its desire to entertain this body. The generous spirit of Los Angeles in seconding the motion, was most neighborly.

Governor Sweet of Colorado, having to name a United States senator, is said to intend to use his own judgment in the selection. This is in spite of the fact that several big men of his party have picked out a man for him. The governor unquestionably is right. There could be scant satisfaction in being governor in title only.

For the advance in sugar there seems to be no explanation but the desire of speculators to make undue profit. There is no lack of the article, and no threat of a shortage, but there are commercial souls so constituted that they know no joy save in garnering gains to which they have neither economic nor moral right.

THE LOVELIEST VIRTUE

By ESTELLE LAWTON LINDSEY

There is no doubt about it, generosity is of all the virtues the most charming.

I do not mean necessarily financial generosity;

that may have its root in ignorance of the value of money or, worse still, in vanity. But generosity of view, of attitude, the gladness in another's pleasure—this is the generosity that makes glad the cockles of the heart and brings friends to the loving spirit that harbors it.

Generosity and envy can never, no never live in the same soul; and it is notable that any study of great artists will bring out the fact that those distinguished by generosity have been the idols of the public rather than those marked only by great gifts of expression.

One of the sweetest stories told of Schumann-Heink concerns her treatment of a young singer who was lovely, talented and inexperienced. When she first drew a small part in an opera company where the great diva was singing she suffered from the envy of the other singers and was kept crying a good part of the time by their cruel remarks.

One evening Schumann-Heink coming off the stage after an ovation heard a singer say something hard and cruel to the girl. Instantly she whirled and threw her arms about the little stranger and faced the company.

"Shame on you all," she cried. "Give the poor girl a chance. Do none of you remember when you were poor and obscure?"

I heard the story from an eye witness and it helped me understand why Schumann-Heink is one of the most loved of song birds. Then there is little Mary Pickford. She has generosity plus. Not long ago she attended a function in Hollywood. It was noised abroad that she was to be there and many aspirants for screen honors came in the hope of a word with her.

And every one got it. Mary spent most of her evening in conference with girls from all over the country, and some of the conferences were quite long. All of them were private and each girl went home with a little flutter of hope put into her by the Sweetheart of America.

One little stranger stormed the Fairbanks residence and sat on the steps until Mary came home. And did Mary reproach her? Far from it. She sat on the steps beside her and gave her generously of her experience and wisdom.

It is that quality shining through personality in some impalpable way that makes the public love some actors and singers and be indifferent to others.

If you want to be loved, cultivate a generous nature. It is a spiritual loadstone and anybody may develop it and enjoy the rewards and honors that go with it.

THE RIGHT WORD

By W. CURTIS NICHOLSON

LETTERS FROM THE PEOPLE

(Find the error in this article.)

Do You "Wear" a Cape?

Or do you carry a cane? F. K. of New York

wishes to know. One carries a cane; wears a watch; carries a stick; wears beautiful gems.

What Is "Not"?

Harry S. Cox of New York writes. "In the sentence

"It is not," what part of speech is "not"? Does it modify

"is" and if so, why?" Not is an adverb, but it does not modify "is." It is an archaic construction to say "It is, not" when one means

that something does not exist, so Mr. Cox's sentence must be an elliptical answer to such a question as "Is the book on the table?" the answer being "It is not," an ellipsis of "It is not on the table." Therefore, in the expression under consideration "not" is an adverb modifying "on the table" understood.

Questionary

A. O. Mitchell of Chicago sends in the following

questionary:

"I should be pleased to have you show in your column which of the following are correct:

"1. Canceled from (or on) the records. Answer: Canceled in.

"2. We carry upwards of (or upwards to) ten million dollars in securities. Answer: Upwards of or upward of.

"3. Within the course (or in the course) of a few days. Answer: Within means sometime with-

in; in means at the end of; omit the course of.

"4. Necessity of (or necessity for). Answer: Necessity of life; necessity to success.

"5. All our efforts towards (or to) the closing of the loan. Answer: efforts towards the closing; efforts to close.

"6. When we might (or may) expect." Answer: We let us know when he might expect him; Let us know when we may expect you.

Yesterday's Error

Don't mispel so much as one word.

Right: Don't misspell so much as one word.

Vocabulary

In one of the foregoing queries we read "It is

not," an ellipsis of "It is not on the table." An

ellipsis is the omission of a word or group of

words necessary to the complete construction of a

sentence, but not required for the understanding of it.

Queries

To P. C. Thompson, Chicago: The following exam-

ples illustrate some of the uses of due: The rent is due today; Obedience is due to one's

parents; In due course; The train is now due; The explosion was due to carelessness; Due to his ab-

sence, the postponement of the meeting was de-

cided upon (not, we decided to postpone the

meeting).

THE LISTENING POST

By James W. Foley

The evil of superstition is that it is destructive.

The superstitions that are spread with reference to the death of the discoverer of the

tomb of an ancient Egyptian monarch.

Too childish for the belief of children not yet beyond belief in goblins and gnomes and fairies.

Superstition has always been destructive.

Its activities have blackened the pages of history with crime and villainy.

It has been responsible for the making of living sacrifices.

Murdering human beings to propitiate a lot of hateful gods.

Gods of the imagination.

If the crops of a district are blighted in these days, we look for the cause.

We do not kill lambs or bulls or human beings in the hope that some bloodthirsty god may be appeased.

We look for the bug or the worm or the aphid that causes blight.

And when we have killed the blight we end the famine.

Suppose we should sit down and beat tom-toms and kill bulls and sprinkle a whole neighborhood with blood.

The blight would continue to work.

There is more virtue in treating a tree with a blight killing gas or spray than there is in all the tom-toms that ever were beaten, or all the bulls that ever were killed or all the lambs that ever had their throats cut.

Science and tolerance are all that bigotry and superstition are not.

Science and tolerance are beneficent.

They are humane.

They are illuminating.

They are reasonable.

While bigotry and superstition are vengeful, cruel, bloodthirsty, murderous, red with blood and black with horror.

Superstition is at once villainous, dangerous, murderous and horrible.

Superstition never learned the reason for eclipses.

But science did.

Superstition or its practices never ended an epidemic of death dealing disease.

But science has done it.

Superstition never ended a famine.

But science has enabled us to destroy famine making bugs and insects and blights and the like.

The witch burners were superstitious.

So they burned many innocent people.

Villainous and horrible crimes done in the name of good.

In the olden days of England men were made to walk over red hot plow shares.

If their feet were burned they were guilty.

If their feet escaped burning they were innocent!

How would you like to be tried by that method?

Superstition is the characteristic of the savage, the uneducated, the barbarous and the feeble minded.

It has fought progress at every turn.

It has hated science.

And if it were not trodden under foot wherever it makes its appearance it would strangle the civilization of the world.

Science and tolerance are all that bigotry and superstition are not.

Science and tolerance are beneficent.

They are humane.

They are illuminating.

They are reasonable.

While bigotry and superstition are vengeful, cruel, bloodthirsty, murderous, red with blood and black with horror.

Science and tolerance are all that bigotry and superstition are not.

Science and tolerance are beneficent.

They are humane.

They are illuminating.

They are reasonable.

COMMENT ON DAY'S NEWS

By HENRY JAMES

In the city the driver inclined to be reckless has the restraining influence of the police, but in the country he is at the mercy of his own foolishness.

Driving at high speed, on a wet and wholly unfamiliar road, is a pretty strong bid for a hospital experience, and often, a summons to the coroner.

A multi-millionaire of Montecito has offered to pay the salaries of speed officers who have resigned, if they will come back. The number of accidents has increased greatly. It is kind of the rich man to make the offer, even though it may be selfish in part. In his very human desire to protect his own bones, he is willing that the public should share the benefit.

The reason for the resignation of the officers was the decision of the supreme court that the county had no right to hire them. The absence of such right seems strange, but anything the court says goes; far be this column from getting into contempt.

But if the county has no right to hire men to safeguard its citizens, has a millionaire any better right? If there is objection to having the men on duty, somebody might get out an injunction or something.

If the county is forbidden to police its highways, it is not clear that it has authority to maintain a sheriff, for it is possible that an alert sheriff, observing a speeder threatening homicide against the community, might presume to arrest him.

The idea, so far as it may be gathered by the layman, is that interference with the speeder is bad form.

Written in New York, but bearing a Riga date, is a dissertation concerning the successor of Lenin. The conclusion is reached that there is none fit for the job.

It speaks rather well, even for Russia, that there should be none fit for that sort of a job.

A woman, condemned to widowhood by her own act, is now on trial, and is receiving the customary amount of sympathy. In all probability she is sorry that she shot the man, and if able to prove that he deserved to be shot, has little to fear from the jury.

Nevertheless, there is a feeling that a pistol is not the proper instrument for adjustment of domestic tiffs.

Chicago is known to have the toughest lot of gangsters who ever cheated the hangman. Recently two, out of many deserving it, really seemed about to go to the gallows, but the court intervened with an indefinite stay. The reason, so far as has appeared yet, was that the pair had expressed a wish for an indefinite stay. However, had the stay not been forthcoming, probably somebody would have opened the jail door, and shooed them to liberty.

There still is a police force in Chicago. Doubtless at times it gets discouraged, wondering what it is for.

"Oneonta" has been suggested as a name for the present South Pasadena.

Before adopting it, it might be a good plan to present the printed name to the first half dozen strangers who come along, and see how many different ways they pronounce it.

New York now has an ordinance forbidding the performance of human files. These are singular persons who have acquired ability to climb perpendicular walls, a wholly useless achievement. Occasionally one loses his toe-grip of a scratch in the bricks, and falls to death. The spectacle is not edifying as he splashes the pavement. It is not especially edifying when he does not fall. In any case he is a disturber of traffic and a bad example to the small boy.

The human fly is a muscular person. He might, after quitting his foolishness, be induced to work.

Evidence accumulates that Russia did a very bad thing for itself in the execution of a priest. Also that it gains nothing by the teaching of atheism. It is because of these things that a Russian, presumably coming on behalf of the Red Cross, is not to be allowed to land. If he represents in any fashion, the prevailing regime, the feeling is that she is not to be trusted.

To dry up the fount of charity must be regarded as a considerable task, but the bolsheviks are on the way to its accomplishment.

Bellamy wrote "Looking Backward." The book made quite a stir once, but for the most part has been forgotten.

Los Angeles is writing volumes about "Looking Forward." It expects to be the seat of Olympic games in 1932. So there's one theme that is bound to last awhile.

Banker Stuyvesant Fish fell dead in New York the other day. There was a time when the name had been familiar, especially when the gentleman had a row with Harriman and, as everybody else, got worsted. But the name was made familiar mostly through the fact that for years, and up to the time of her death, Mrs. Stuyvesant Fish had been the leader of New York's exclusive society.

Writers declare in novel and story that crime does not pay. All detectives confirm the view. Every criminal, caught and punished, swells the chorus. Nevertheless crime continues unabated.

The novice can't get rid of the notion that he is the exceptional person who can break the rule.

Watching the Parade

By JOHN PILGRIM

This morning Tim Crumb came into the office with a whine. This is the way Tim Crumb stacks up:

Twenty-seven years old, strong, hungry, sound, with a nice little wife, seven hundred dollars in the bank, and a good reputation. He recently lost his job, owing to the wholly unexpected collapse of the firm for which he had been working for five years. Tim seems to have thought this firm had the only job in the world. He has been looking around for another in a sort of a half-hearted way

NEWS AND VIEWS OF BURBANK AND ITS ENVIRONS

CHARLES WEBER WINS FIFTY DOLLAR PRIZE IN ORATORICAL CONTEST AT HIGH SCHOOL

"Lincoln and His Devotion to the Constitution" Is Subject of Prize-Winning Essay

Rapturous applause, cheers and clapping, loud and long, greeted the announcement that Charles Weber had won the \$50 prize offered to the winner in the oratorical contest held at the High School auditorium Friday morning, and by so doing has a chance to appear in the final contest in Los Angeles.

Each one of the contestants had a very good oration and delivered it well. Through the courtesy of S. F. Moore, principal of the high school, and Miss Katherine Allen, dean of the high school girls, the essays of the contestants were given to the Daily Press for publication.

The program for the morning was:

1. Flag of Truce, Laurenceau
2. Hamilton, the Master Builder, Virginia Hare
3. Lincoln and His Devotion to the Constitution, Charles Weber
4. Fishing, Parks, Boys' Glee Club
5. Lincoln, the Humanizer, Blanche Bennett
6. Abraham Lincoln's Devotion to the Constitution, Thelma Gibbs
7. Slumber Boat Song, Gaynor
8. Daniel Webster, Exponent of the Constitution, Wadsworth Viney
9. Webster and the Constitution, Frances Mason
10. Decision of Judges, Leonard F. Collins

Presiding, Leonard F. Collins, principal of Elementary Schools. Judges, Mr. Colburn, secretary of Chamber of Commerce; Mr. Kline, Mrs. E. R. Perry.

Mr. Colburn, in happy vein, announced the decision of the judges. The audience leaned forward and listened intently as he said: "It is the opinion of the judges (long pause) that the student body is an exceptionally fine one. The pupils enjoyed the trial, and leaned forward once more, as he began to talk, thinking the announcement would follow, but he went on to say that it was the judges' opinion that the stage settings were very pretty and appropriate. After the children recovered from the effects of the surprise at not hearing the decision this time, Mr. Colburn said

that the judges thought that the Girls' Glee Club, the Boys' Glee Club and orchestra were excellent; that the presiding officer, Mr. Collins, made a very good chairman. At last, after speculating whether or not it would be advisable to speak of the matters being discussed by the State Senate at Sacramento, he announced the judges' decision was that Charles Weber had won first prize.

Wild cheers and hearty applause flooded the auditorium. Principal Moore dashed up to the stage and congratulated him. Then, in the best stage manner, Charles stepped forward and clearly and distinctly, addressing the honorable judges, faculty and student body, each separately, said, "I thank you."

Mr. Collins, closed the program by saying that it was easily seen who would be the winner at Santa Monica in the semi-final contest and in the final contest which will be held in Los Angeles in May, when the winners of all the elimination contests in Southern California will try for the prize of \$1500.

The prize-winning essay follows:

LINCOLN and His Devotion to the Constitution.
An Oration by
CHARLES WEBER

When Lincoln became president, the United States was in the greatest turmoil in its history. Men were slaughtering the constitution by carrying interpretations of it to dangerous extremes. The abolitionists were demanding that the government be wrecked, if necessary, to secure freedom for all within the nation. The slave holders were seeking extensions of their property rights in the traffic of human beings.

A man with the wonderful power of mind to be able to weigh both sides of the question at issue and the strength of character to do that which he understood to be right, had become leader of our nation.

Lincoln, ever since a young man, had been strongly opposed to slavery, and it meant much to him, but now, constitutional government meant more. He would, he said,

see all men loyal to the splendid governmental system which had been set up, and at the same time, he would like to see every man free. Amid the tumult between the abolitionists and slaveholders he never lost sight of the importance of preserving our constitutional system of government. As a member of congress Lincoln stated his views on the constitution in these words: "I wish now to submit a few remarks on the general subject of amending the constitution. As a general rule, I think we had much better let it alone. No slight occasion should tempt us to touch it. Better, rather, maintain ourselves to think of it as unalterable. It can scarcely be made better than it is. New provisions would introduce new difficulties, and thus create and increase the appetite for further changes. No, sir, let it stand as it is. New hands have never touched it. The men who made it have done their work and passed away. Who shall improve on what they did?"

This spirit of the president now must find expression in practical terms. His ideals always took a form that counted for the benefit of the several states, for instance, Kansas and Nebraska were to be common states of the union. The question at issue was—should or should they not be free states. The future of the union was at stake. Lincoln faced the question squarely. His friends advised him to keep still on that one subject, but Lincoln said that he could not keep still and preserve his honor. In his debate with Douglas he declared that this country could not be "half free and half slave." That sentence cost Abraham Lincoln the senatorship of Illinois, but later helped preserve our government and won for him the presidency of the United States.

When great problems arose before Lincoln he always prayed earnestly for guidance in his decision. Such were the circumstances when the Emancipation act awaited his signature, he felt that alone he could not sign it, so he sought a higher guidance throughout a whole night, signing the proclamation at an early hour of the morning.

Lincoln took as his keynote the fact that the word "slavery" was not mentioned in the constitution. From this he drew the conclusion that our forefathers were not in favor of slavery.

While Lincoln was absolutely opposed to slavery, he so firmly believed in the constitution that he often risked losing many of his strongest supporters. The ruling idea that swayed his every act was the preservation of the union. He also sought to respect the powers of the government. This was indicated by his desire to keep the judicial branch of the government in action. He believed the safest way to reach this end was to exercise

the constitutional method, namely through the ballot, which would make it possible to hold the judicial branch without lessening its rights.

His words to Greeley were fitting: "I would save the union. I would save it the shortest way under the constitution. The sooner the national authority can be restored, the nearer the union will be to the union as it was. If there be those who would not save the union unless they could, at the same time, save slavery, I do not agree with them. If there be those who would destroy slavery, I do not agree with them. My paramount object in this struggle is to save the union, and it is not either to save or to destroy slavery." Thus above all personal ambition, above what his friends might think of him, above any opposition from his enemies, he held sacred the preservation of the American constitution.

The question might be raised, why was Lincoln so anxious to save the present form of government? It was because history had been his teacher. He had studied the progress and the downfall of European governments and found them not only weak but dangerous. Germany, for instance, had been swept into anarchy because of a lack of union of her small states. Practically all the other governments of Europe had failed. But on the other hand, the United States had established a government of law and order second to none in all the world. Thus after these many years, history proves that Lincoln was a true prophet.

Not only was Lincoln anxious to maintain the constitutional government while exercising his duties as president, but also as a private citizen of the United States. This argues all the more for his pure love for the government. Had he cared so much for the constitution only while he was president some would have said that he was working for political gain, but since he desired the present government to exist while not seeking office, surely at heart Mr. Lincoln was seeking only a good government. As said before, he placed ideas of government above his ideas of private gain.

A higher guidance seemed to tell him that no nation could be safe unless all the people of that nation had equal rights.

He also believed that a citizen's first duty was to defend the constitution of the United States and second, the union existing thereunder. Therefore, Lincoln held to the fact that the people should be given knowledge to guide them in their voting. They should know who are in the various branches of government and what these branches stand for. Lincoln's great understanding of the human mind led him to believe that man wanted

ORGANIZE NEW ART SECTION

Members Will Study Handcraft on Friday Mornings

The new section of the Women's club, the arts and crafts department, met Friday morning in the Women's club rooms and organized. Mrs. Irving Sherlock was appointed temporary chairman and Mrs. A. C. Fillbach, secretary, until the constitution and by-laws have been voted upon and election held. The course has not been completely outlined, but the class will first study polychrome. Later it will take up parchment work and various lines of handcraft. Mrs. Stumbo has been appointed to find out about the price for lessons from an art instructor.

Mrs. Johnson, Mrs. Fisher, Mrs. Ellis, Mrs. Cummings and Mrs. Wilson were the women appointed to present the by-laws and constitution at the next meeting which will be at 9:30 o'clock Friday, April 27.

Those present at the meeting Friday were Mesdames Johnson, Fillbach, Sherlock, Fisher, Wilson, Stumbo, Walker, Cummings, Groschong, Blabon and Ellis.

To Attend Church Dedication in L. A.

Rev. Leslie G. Parker, pastor of the Christian church, and some of the prominent church members will attend the dedication of the Cypress Park church in Los Angeles Sunday afternoon.

to do the right thing whenever proper light had been given to him. He could not endure to see the human mind trampled beneath the government, neither did he think that the government should be trampled beneath the foot of man, so his way to preserve the constitution was to teach man the proper respect for it. The right to preserve the constitution was not only his right but the people's right.

So you see, my fellow countrymen, when we remember the high ideals of Abraham Lincoln, when we remember his devotion to the constitution, when we think how he was guided by a divine light, when we study the whole history of this great man, it is only natural that the world should find him true and devoted to the American constitution.

POSTAL CARRIERS VISIT GLENDALE

Burbank city letter carriers, William H. James, Edward Hamlin and William Shipman, attended a meeting of the Glendale branch of the National Association of Letter Carriers, of which Mr. Hamlin is already a member.

Mr. James had his membership transferred from Charles City, Iowa, to the Glendale branch, and Mr. Shipman made application to become a member. The Ladies' Auxiliary served refreshments. At the close of the meeting, Carrier Hamlin was presented with a gold membership button by his brother carriers of Glendale, in appreciation of his splendid service as a carrier in Glendale for years. The Glendale boys were sorry to have Carrier Hamlin leave but wished him success as a Burbank carrier.

MUSIC MEMORY CONTEST SCRAPBOOK CLIPPINGS

By the waters of Minnetonka (Liaurance). Thurlow Liaurance is a gifted American composer and leading authority on Indian music. He has lived with the Indians and studied their music first hand. Over five hundred records which he has made of the Indian life are preserved at the Smithsonian Institute at Washington D. C.

The composer has passed through many thrilling adventures in his efforts to secure these themes. In one trip he nearly lost his life, and was seriously crippled by being frozen in the mountains of the northwest.

Many of the themes he used were taken down from the Indian flute, which is made from willow or cedar and is used by the Indian lover when he serenades his maiden sweetheart.

Often Princess Watawaso (Bright Star) has sung the Indian songs of Liaurance. She is an accomplished mezzo-soprano, daughter of a Penobscot chief of Indian Island, near Oldtown, Maine. From childhood she has been taught the traditions and customs of her people. The rich melody quality of her voice is particularly noticeable when she sings the Indian serenade "By the Waters of Minnetonka."

The words, copyrighted by Theo. Presser Co., 1914, are:

"Moon deer, how near your soul divine,
Sun deer, no fear in heart of mine,
Skies blue o'er you, look down in love;
Waves bright give light as on they move.
Hear thou my vow to live, to die,
Moon deer, thee near
Beneath this sky."

ONE, TWO, THREE, BEETHOVEN TO BEND! SAYS HEAD OF SCHOOL

"One, two, three, bend," came the voice of Superintendent L. F. Collins from around the corner. What did this mean? Was he taking reducing exercises, or was he trying to get fat? It certainly sounded like he must be indulging in Walter Camp's "Daily Dozen."

Investigation showed a whole class of little boys one, two, three, bending. They looked like perfectly good, rosy cheeked, hundred percent boys, so it surely was not a special class. Whereupon the inquiring reporter questioned the instructor and found that the boys were being especially honored by his guidance because Miss Clara, the physical training teacher at the Thomas A. Edison building, had fallen on the school steps and sprained her knee.

During her absence Superintendent Collins will have charge of her classes. He said he was glad to drill them for they are such a happy enthusiastic group that it is a pleasure to have charge of them.

Daughter Born to Mr. and Mrs. James

Postal Carrier William James has found his 50-pound mail pouch as light as a feather this week for he has been unconscious of it. He has been occupied wondering when he would see his daughter, Edna Ann, born April 7, at Pontiac, Mich., and whether or not the little girl looks like himself.

Mrs. James and daughter are planning on coming to Burbank to make their home sometime next month.

J. O. C.'s TO HOLD DISTRICT MEET

The J. O. C.'s of this district will meet at the Methodist church Sunday afternoon, Los Angeles, Glendale, Pasadena and surrounding towns will be represented. A light luncheon will be served at 1:30 o'clock and will be followed by the district meeting in the afternoon.

Miss Margaret Mooreland is one of the district officers and will be in charge of the program.

Emil J. Held has severed his connection with the Radcliff Realty company and has joined the A. C. Gage Real Estate and Insurance company.

The second week of the Music Memory contest given under the joint auspices of the Burbank Daily Press and the Burbank schools closed Friday with the pupils showing remarkable ability to appreciate and recognize the classical compositions which they have been studying.

The next concert at which some of the selections will be played will be given at the Thomas A. Edison building on Friday, April 20. The junior pupils of Mrs. Zefer Algotta Sparrow, will be presented in recital and will play several of the numbers.

The following Monday afternoon, April 23, Mrs. Walter Fisher is sponsoring a matinee concert in which musicians of the city will sing or play a program of eight numbers of the Music Memory contest selections.

The list to be studied this coming week will be: Minuet in G (Beethoven); Moonlight Sonata (Beethoven); Barcarolle "Tales of Hoffman" (Offenbach); By the Waters of Minnetonka (Liaurance); My Heart at Thy Sweet Voice (Saint-Saens); Humoresque (Dvorak); Serenade (Schubert); Hark, Hark, the Lark (Schubert); Trauerelei (Schumann); Anitra's Dance (Grieg).

Firm Will Build Twelve New Homes

Elmer Dale and A. W. Oustad have formed a new building firm in Burbank and next week the firm of Dale & Oustad will begin constructing three dwellings on Verdugo avenue between Tenth and Eleventh streets.

They will also build another one at 703 Cypress avenue. This will be the beginning of a series of good substantial frame dwellings to be erected by this firm. They have employed John Neilsen as carpenter foreman. Within a short time they will have erected 12 of these dwellings.

SANTA CLARA, Calif.—The Owl prize for oratory at the University of Santa Clara has been awarded to John Marcus Jackson, a junior student from Seattle, Wash. The winning oration was entitled, "The Grim Destroyer," and dealt with the evil results of narcotics in the home.

LOTS

BEAUTIFUL
BELLEHURST
PARKIN THE HEART OF
GLENDALENOW SELLING
LIKE WILD-FIRE!

This magnificent old estate—an enchanted garden in the midst of the fastest forward marching city in America.

Come today—at once—and see with your own eyes these wonderful home-sites covered with fine old palms, magnolias, oaks, and hundreds of bearing orange, lemon and olive trees.

We are creating here in Glendale a unique residence park for Southern California—one that will rival and excel in beauty the thousands of acres of distinctive home communities we have developed in Piedmont and Oakland in the San Francisco Bay region.

Bellehurst Park is dedicated to fine homes. Restrictions are carefully worked out to insure steadily increasing values. All city improvements of the highest type are now being installed at our expense. Pacific Electric trains only 2 blocks away. Four schools within 5 blocks. Very easy terms to first buyers.

STOP TO THINK—**

If this precaution is not taken the top of the door will sag, causing the plaster to crack.

SECOND UNIT OF WONDERFUL BELLEHURST TRACT GOES ON SALE TODAY; LOCAL BUYERS FAVORED

Sale of First Unit Benefited Glendale Tremendously, But Cream of Entire Valley Is in Unit No. 2; Values Are Sure to Go Soaring

Glendale is again favored with a wonderful opportunity to invest locally ahead of outside buyers. The Walter H. Leimert Co. today announces a special pre-opening sale to Glendale people only of a portion of the second and last half of Bellehurst Park.

The sale of the first half of this beautiful tract has set all the Southland talking and has attracted much favorable notice to Glendale as well as bringing in over 500 outside investors who are now vitally interested in Glendale's future. Over a million dollars' worth of this famous property was purchased in four weeks.

Over a quarter of a million in sales every week while it lasted.

The marvelous beauty of the second and higher half of Bellehurst park has caused many Glendale people to resolve to purchase here at once upon notice of the first opening. Today the plot is complete on a portion of this elevated tract and according to the Leimert Co. reservations may be made today and tomorrow in this new subdivision.

Every lot in the new unit is over 650 feet above sea level with a magnificent outlook over a panorama of valley, city and mountains unsurpassed in the metropolitan area of Los Angeles. It is hard to believe that such entrancing beauty can be found anywhere in the confines of a great city, and yet here we have in the very heart of Glendale's best residence section a tract of most unusual distinction.

The last half of Bellehurst park is destined to be the very finest residence park that it is possible to develop. All the years of experience of the Walter H. Leimert Co. in development enterprises in the San Francisco bay region will be used in bringing this tract to its ultimate perfection as a charming home community where every house and lot is of real artistic distinction.

The best residence sections of a city have one important factor in evidence. Every house on the street is a good house well designed and attractively landscaped. Here in Bellehurst park, a home community of 200 acres is to arise without one single undesirable structure in the entire tract. The result will be a park of permanent beauty with an ever increasing value because of its everlasting desirability.

Improvements are being rushed to early completion in the first unit by Bates & Borden Inc., who also have the contract for the last half. All city improvements including macadamized streets, cement curbs and sidewalks, water, gas and elec-

tricity are included in the purchase price of each lot.

Representatives of the Walter H. Leimert Co. will be on the property all day every day, rain or shine, from now on. The tract office for the time being at least will remain at the corner of Dryden and Jackson St., just two blocks east of Brand boulevard. Maps and prices on all lots in the new section are available either here or at the downtown Glendale office at 246 Brand boulevard. A tremendous rush for the best locations is predicted by the Leimert Co., so that prospective buyers should allow nothing to delay them in making their advance reservations today and tomorrow. A week later the public announcement of this new opening sale will appear in the Los Angeles papers, to be followed by a steady stream of outside buyers as occurred at the opening of the first half.

HATCHING SEASON IS SPRING, SUMMER

In poultry the reproductive process is accomplished in two stages. The egg is first produced, developed, fertilized within the body of the hen and laid. Then the egg is subjected to a certain temperature (100 degrees F. or a little higher) for about twenty-one days, during which time the embryo develops and hatches out of the shell as a chick.

The process of developing the embryo within the egg by means of heat is called incubation. When this is carried on by a hen it is known as natural incubation; when incubation is accomplished by means of a machine, oven or other

device it is known as artificial incubation.

Man has little control over the reproductive process in its first stages except so far as the selection of the breeders is concerned. In the second stage, however, if artificial incubation is practiced, he can, by his methods of conducting the process, greatly influence the development and future well-being of the chick.

WHEN FERTILE

In order that eggs shall be fertile the hen that lays them must have been mated with the male. Hatchable eggs are those that are fertilized and have vitality enough to insure the production of a living chick.

Eggs are usually fertile up to and including those laid the ninth day after the hens are separated from the males. Fertilization is impossible after the sexes have been separated for twelve days or more. Eggs may safely be counted

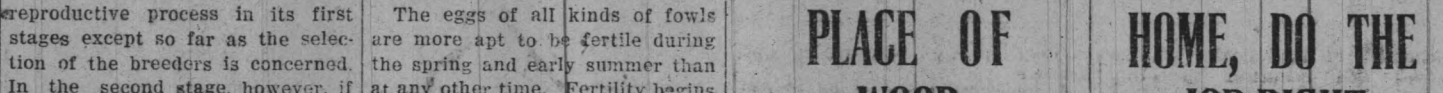

as fertile after the males have been with the hens for nine days or more.

The eggs of all kinds of fowls are more apt to be fertile during the spring and early summer than at any other time. Fertility begins to decline with the commencement of molting, and during the fall and winter the production of fertile eggs is at a minimum. The average production occurs in January or soon after.

Stevens Construction Co. Issues New Book

The Stevens Construction company has issued a new bungalow book, which will prove a great convenience to builders and others desiring to erect the California type of bungalow. Details are given in an advertisement elsewhere in this issue.

ONE OF THE BEAUTIFUL FOOTHILL SCENES TO BE FOUND IN BELLEHURST UNIT NO. 2, THE WONDER TRACT

CONCRETE TO TAKE WHEN WIRING THE PLACE OF WOOD HOME, DO THE JOB RIGHT

"We are using our supply of wood in the United States," says an authority, "four times as fast as it is growing again."

That fact may be as good a starting point as any from which to consider the place of concrete in home building.

Concrete today has a particular service to perform. It furnishes a means of relieving the present shortage of building material and of skilled labor and is assuming a position among the various substances of which houses are built that may become increasingly important.

For the season of 1923 house building conditions are not ideal. Shortage of labor is likely to force building costs to a higher level unless relief is brought.

Concrete, rightly handled, is a satisfactory solution of the difficulty. What is concrete? Concrete is stones mixed in mortar. More specifically it is a mixture of portland cement, sand, gravel and water.

When it becomes a fluid mass it can be molded in any form desired. As soon as the water touches the portland cement the hardening process begins.

The exact chemical change which takes place in the cement hardening is still a mystery, but the accomplishment is well understood and can be controlled, so that concrete can be made to set up, the term used for hardening, quickly or slowly.

Thus man accomplishes in a few hours what Nature requires ages to accomplish—the making of stone.

It comes into the building of every house. Foundations are of concrete; chimneys are often made of it.

Some of the materials with which to make it are found frequently on the ground near at hand. They are sand, steam cinders and gravel.

Houses built entirely of concrete are perfectly practicable, and the labor which can be used in concrete building is for the most part of the unskilled type, hence readily available.

Contrary to general opinion, concrete construction is not new and untried.

Great structures erected by the Romans which have withstood the ravages of 2000 years are of concrete.

In many places excavations show marks of boards which have made impressions on the concrete walls of such structures.

Those marks, still plainly visible, show that their method of using wooden molds were not unlike the building practice of today in making walls of the molded type of concrete.

There are strong possibilities that 100 years from now concrete will be the universal material for home building.

HOW TO GROW THE SNAPDRAGON

In snapdragons, a large number of new colors, in both the giant, the little dwarf, and the dwarf types are offered. The best for the average flower garden is the half dwarf, and some of the new soft colorings with peculiar blendings and blotchings are fascinating. These plants should be started indoors, if possible, although plants sown outdoors as soon as the ground is workable will give bloom by midsummer.

USE BRAINS IN TURNING

Get on your feet, when turning the right, should see that his car is in the "right" line when he approaches his turn.

GROWING LETTUCE FOR EVERY SEASON

A DIFFERENT SALAD DRESSING

One-half teaspoonful of salt, scant dash of cayenne pepper; one tablespoonful of catsup; four tablespoonfuls of oil, adding gradually; one clove of garlic mashed upon the dish and fragments removed; one tablespoonful of tarragon vinegar. Mix all ingredients except the oil, then stir this in a little at a time briskly until all is incorporated, or mix all at once and blend with an egg beater.

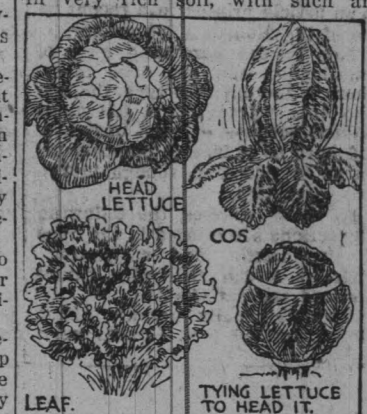

LETTUCE FOR EVERY SEASON Lettuce has come to be a staple vegetable on the city table. It appears in many families almost as often as potatoes and fills a dietary need quite as important. It supplies in cheap and most palatable form the vitamins A, B and C, which have been discovered to play so large a part in health maintenance.

Next to Swiss chard, lettuce is the most profitable vegetable for the home gardener. It will be found even more useful than chard, for it will be welcomed on the table every day, which can hardly be said of chard. Every well-planned home garden should provide for a succession of lettuce crops which will provide the finest quality for the longest season; and this takes careful planning.

Lettuce is a cool-season crop. When hot summer comes it runs to seed so quickly that from the last of July to the first of September it is possible only in shaded beds, carefully tended, which comparatively few will bother with. But during the rest of the garden year some variety of lettuce is possible.

There are four types of lettuce generally grown in this country—leaf, butter-head, crisp-head and cos. All lettuces tend to make heads, and in California all do. It requires to be grown "fast" without check, to produce the "tender," sweet leaves that we enjoy. The soil, then, must be light, quickly warmed, as rich as possible, especially in nitrogen, and there should be a plentiful supply of water. The richest spot in your garden should be chosen for lettuce and then it should be manured, if possible, and additional feeding with nitrate of soda is advisable.

The first variety to sow is head lettuce, which should always be started indoors. The plants may be set outdoors as soon as the garden soil can be prepared. Keep a reserve in case the first planting should be killed by a hard freeze. In very rich soil, with such an

Types of Lettuce early start, but lettuce of these varieties should be ready in 70 days from date of sowing.

When the head lettuce is set out sow seed of a leaf variety. This may be sown thickly and thinned out to one plant every two inches. Alternate plants may then be harvested half grown, until a spacing of six inches has been reached. All lettuce varieties need at least six inches in the row to reach full growth, and some need more.

Seed of a crisp heading type, such as New York, the largest of lettuce varieties, or Mignonette, one of the smallest and surest to head, may be sown at the same time as the leaf varieties and the seedlings transplanted when they make true leaves. New York must have at least a foot between plants in the row. It will mature slowly, stand hot weather well and furnish the last crop of the first season.

Cos lettuce, or romaine, which many esteem as the finest of lettuces, may be started indoors or outdoors to fit into the succession where one pleases. It matures in about 80 days. For the fall season, omit the crisp heads and start the desired varieties in a shaded seed bed in July to be transplanted when the cool weather comes in late August.

In any case it is much wiser for home-builders to study first their needs and go to contractors with a fair idea of those needs, rather than leave him to lay out the plan for the electrical equipment in toto.

Frequently householders on moving into new homes, wherein they have dreamed will be found a crystallization of long-cherished hopes, have discovered surprising truths, one of them being that small conveniences, which have appeared of trivial importance in the drawing up of plans, are when measured by day-by-day living the real essentials of comfort.

In nothing is that more true than in electric wiring and fixturing.

Back of the small push button appearing upon the wall is a band of swift, skillful, silent servitors whose energies and attainments are little understood, even today.

In the wires, sheathed in lath and plaster, flows the solution of practically every labor difficulty with which householders find themselves confronted.

There are in those wires potentialities of illumination, convenience, service and warmth enough to make houses into real homes of freedom and inspiration, providing those wires be intelligently appointed and provided sufficient doors be opened through which those potentialities may pass into realities.

18 LOTS LEFT IN WING ORANGE GROVE

There are only 18 lots remaining unsold in the Wing Orange Grove tract.

Mr. Investor-in-real-estate, do you realize what that means?

It means, in a word, that there are only eighteen chances for the people of Glendale and surrounding country to get one of these lots at the rock-bottom price. After they have been sold the fellow who buys them will be sure to tack a little on to his selling price for profit. He is not in the buying and selling game for his health. Therefore, if, after these 18 lots have been disposed of, you decide to secure one of the homesites in the Wing ranch, and either build on it yourself or hold it for speculation, you must pay a profit to the fellow who does buy at the initial price.

The way the lots in this tract have been snapped up is a marvel. From the very first day the tract was placed on the market the demand has been remarkably brisk. As many as eight lots being sold in a single day. This activity has continued until now there is just a handful of the beautiful homesites left.

Whenever there is a demand such as has been shown in connection with the Wing tract, there is sure to be a reason. There are many reasons why this activity in the lots in this tract should have occurred. The tract has everything that should be desired in the way of school facilities, public utilities, transportation—everything in fact, that the first-class home location should have.

The wonderful building activity that is occurring in this tract is making its lots unusual investments. Right now there are a dozen or more homes in course of construction and many others for which plans are being drawn. These homes are not of the ordinary character. In their planning and in their construction extreme care has been and is being taken. Some of the finest architects in this section of the country have had a hand in the designing of these structures. The architectural department of the Bentley Lumber company having turned out the work.

All of the lots in this tract are covered with orange trees. Any one who has lived in Glendale for the past few years knows the quality of the fruit that the Wing ranch has produced. The same old type of oranges that this ranch has always produced goes with every lot.

CARE FOR SPRING GARDENING NOW

Too much emphasis can not be placed upon the importance of all gardening activity at this season of the year.

The weeks are quickly passing during which our efforts in the garden will tell for their greatest worth.

If the garden has not been fertilized already it should be done at once with well-rotted manure spaded deeply into the ground. Flower beds, shrubbery masses, and trees should all receive their annual supply of applied plant food at this time.

There are very few gardens that will not be benefited by such treatment.

This is also the best time of the year in which to fertilize lawns.

Fertilizer, applied now, is far more beneficial than that put on the lawns in the fall or winter months, for the grass is now growing and able to assimilate such food, aside from the fact that little of the liquid manure will now be carried away by rains.

Most garden spots, except those in which it is prevented by root crops, bulbs or the like will be improved by a thorough cultivation.

The soil should be turned over, aerated and pulverized to a state of friable tilth.

Weeds, of course, should never be tolerated.

If soils are heavy or tend to sourness they will be benefited by an application of gypsum, marl or ordinary lime, or by soot or wood ashes.

These materials will not only add valuable chemical ingredients to such soils, but they will improve their physical qualities by rendering them more friable.

The time is fast approaching when the more tender, summer-growing plants may be set in the open ground.

Chrysanthemum cuttings should be made from the growing shoots of old roots during April.

When rooted they will be ready for planting in the open ground.

Annual varieties of aster may be set into the ground from seed-flats where they have been previously planted.

Centauria, calliopsis, delosia and salvia may be planted from their flats into the open ground.

Seeds of the following annuals may be sown during the month of April: amaranthus, aquilegia, aster, ageratum, cobaea, celosia, centaurea, coreopsis, cosmos, eysenckia, vine, dahlia, daisy, helianthus, heliotrope, hennemannia, ipomoea, marigolds, mairandia, mtna, morning glory, nasturtium, poppy, portulaca, salpiglossis, scabiosa, shasta daisy, statice, verbena, wallflower and zinnia.

One may also plant bulbs or roots of amaryllis, begonia, canna, dahlia, gladiolus and the tuberose. The elephant ears (Caladium) may also go in the ground where danger of frost is generally past.

A bill has been introduced in Washington authorizing automobile rural postal routes of from 25 to 75 miles.

Sparr Heights Outlines Etched in Design With Plow and Tractor

NATURAL BEAUTY OF FIELDS AND HILLS ARE BEING PRESERVED IN THE BEAUTIFUL SPARR HEIGHTS

Owners of the Wonder Subdivision to the North Are Doing Everything They Can to Maintain Their Holdings in Wild Condition

"We think it a great mistake," said Mr. Walters of Barnum and Walters, subdividers and developers of the Sparr Heights tract, "to denude the hillsides entirely of the native shrubs and trees and to clear the level land so completely of all vegetable life that it is bare and forbidding. Upon our tract, in the level portions, on the hillsides and the summits, we have endeavored to preserve those native shrubs and trees that add beauty to the homesites.

"Californians are reckless of the great horticultural wealth of these mountains and do not realize that in eastern gardens many of the shrubs that they regard as mere brush are cherished as rare plants and prized for their beauty as well. For instance there is our ceanothus. Of course, where it grows in such profusion as to make a jungle, we clear it away, but we endeavor always to leave several specimens upon the sites, for the foliage is evergreen, and in the spring, the delicate flowers of these shrubs, commonly known as the mountain lilac, are exceedingly lovely, and the blue-flowering ceanothus is already comparatively rare.

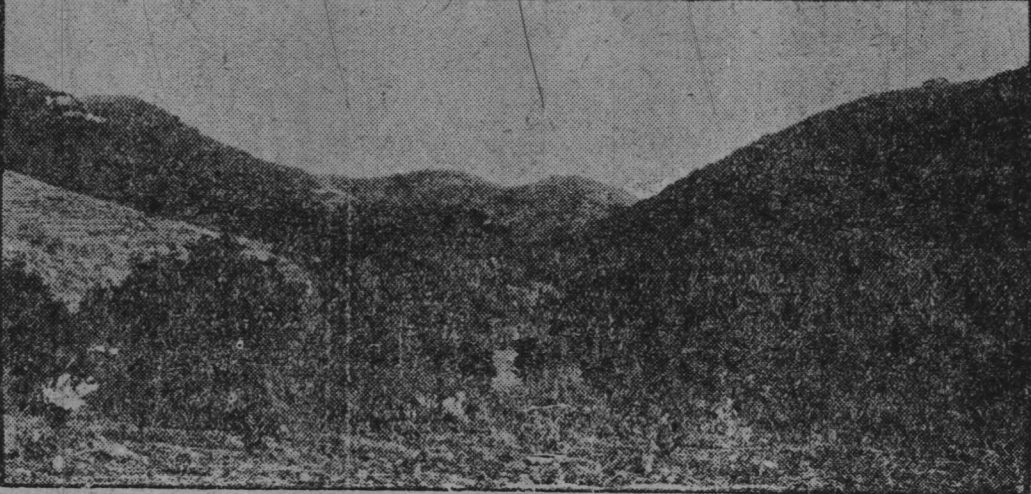

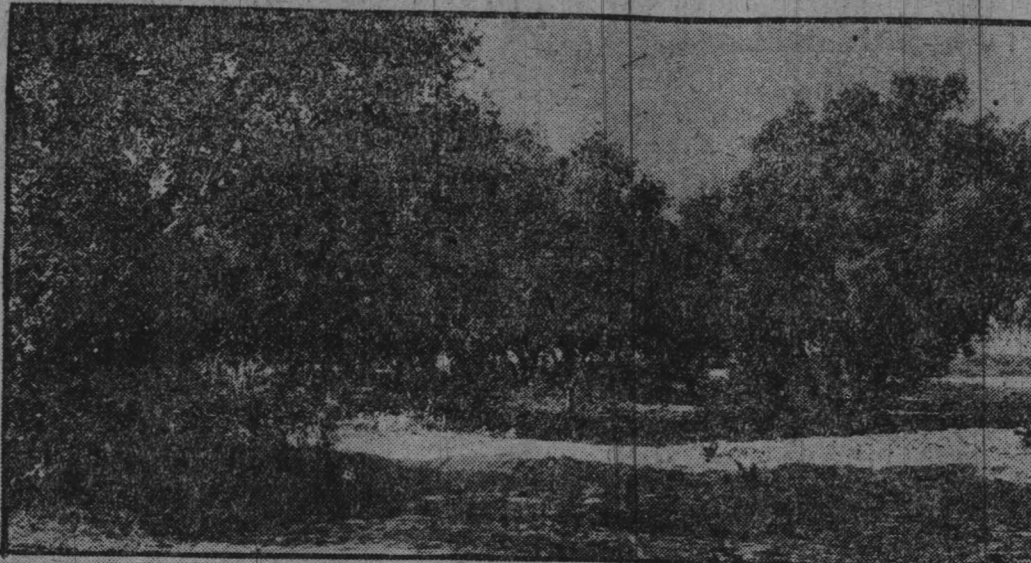

"Then there are the two varieties of the rhamnus, a symmetrical and graceful shrub with silvery leaves, bearing red or black berries. Where it grows untouched it is apt to spread and form thickets, but properly trimmed and cared for it is a great addition to the ornamental garden, as is also the shrub commonly called the 'wild coffee.'

"We have, too, on these hillsides, the vagabond chemise, I don't know why so named by the Spanish inhabitant, unless it was because it covered everywhere the naked body of the land. It thrives everywhere, but a few specimens preserved in the California garden will always prove attractive, for its slender pedicels of tiny, perfect, star-like blossoms are fragrant and delicate and were it uncommon, instead of being as plentiful and prolific as

the sagebrush, it would be considered most beautiful.

"We have all of these trees and shrubs on our slopes and summits and now and then we find a manzanita, with its mahogany colored trunk and stems and little crimson apples. Sumacs and elderberry, with their flowers and berries, are also occasional, but the oak tree is the glory of Sparr Heights.

"There is no tree that grows which is more beautiful than the California live oak and none that is

more justly prized. Even its humble relative, the scrub oak, can be trained into a graceful and worthy tree and it deserves the name of 'scrub,' except where it has been allowed to spread unchecked.

"The oaks on our tract have been preserved in their natural beauty, and in every portion of the subdivision there are charming oak clusters and groves which add much to its attraction. Some of these groves are delightful avenues of shade and verdure and some of them grow upon the slopes so regularly placed and so perfect in shape that they look almost like an orchard planted by the hand of man.

"Other of our oak groves have beautiful native shrubs interspersed between the trees and all are delightful places to rest or picnic, for the observer, lying beneath their shadow, may view the panorama of valley and mountains with

have not that spirit of commercialism that condemns to death the verdant beauty of our valleys and hillsides.

"We find that the intelligent home seeker deprecates the denuding of the land as much as we do. They realize that beauty is not bare ground, and that neither is beauty straight lines of roadway always crossing at right angles regardless of the nature of the terrain. When the contour of the hills is followed, as in our plans for this tract, and the trees preserved, as we do here, utilitarianism unites with beauty to form the perfect concept."

Smart Suede Tams
Very new and extremely smart are tams of suede in lovely shades of rose, blue, Lanyin green and beige covered with embroidery done in gold, silver, and bright colors.

BIG DEMAND FOR SANITARIUM LOTS

Within 48 hours from the time that the sale opened on the lots in the Glendale Sanitarium business tract, 80 per cent of the sites had been sold and according to Guy M. Rush, who handled the sale, the remainder were expected to be sold within another few days on account of the many prospects who are calling for information.

"If it were not that the Glendale sanitarium, felt the necessity of making a clean sale of the entire property, I believe they would have reserved the remaining lots as an investment for the sanitarium," says Mr. Rush. "But inasmuch as the creation of their new group of buildings is rapidly progressing, they want every lot sold and have instructed us to dispose of every one of the remaining few lots at prices below the market. This is indeed an opportunity for those who seek a proven investment."

"Such business property as we offered at such low prices is rare and seldom is it ever offered in open sale. In fact, out of the dozens of subdivisions we have handled, this is the first one directly in the center of a city and on one of its principal business streets. The value of this site was evident to men who know values, judging from the sales which were consummated by realty operators and brokers both on their own account and for their clients in this tract."

"I believe that we set a new record in quick disposal of business property in the thriving neighboring cities around Los Angeles, in this sale."

Preparing for Visit of Regional Scout Director

(By Associated Press)
VENICE, April 14.—The Venice Scout committee is making plans for the visit of Charles N. Miller, regional director, in charge of Boy Scout activities in California, Arizona, Utah and Nevada, who will come to Venice Thursday. The Venice committee is now organizing ten Scout troops.

VENICE, April 14.—To have the Artists' Club's ship anchor at Venice would help create an art center in Venice, F. H. Frolich, head of the club, wrote J. C. Barthel of Venice, who is communicating with the government officials in an effort to obtain the ship.

Hosiery to Match Dresses
It is now possible to match the most vivid evening gown in hosiery. In one display were silk stockings in lovely shades of rose, green, orange and blue.

ible from every part of the tract. "I am a lover of our native trees and realize that they are an asset so valuable that they should be preserved. Every attention bestowed upon them is gratefully recompensed by these wild forest children. I am a lover, too, of our California flora of every kind, and it seems to me to be a great callousness to beauty that will allow the destruction of such of them as I have mentioned and especially of the native holly, now so scarce on account of careless or ruthless vandalism.

"The grubbing up and consigning to flames of the entire verdure of valley or hillside is a great mistake. Of course, roads must be cut and the land cleared of jungle, and that we do in Sparr Heights, but we

Venice Reorganizes Its Chamber of Commerce

VENICE, April 14.—With \$1000 raised within a few minutes among the directors, a movement for the rejuvenation of the Venice chamber of commerce was launched last night at a meeting of the board. A big banquet, with William G. McAdoo as the chief speaker, will start off a campaign for 100 memberships of \$100 each, according to present plans.

Coastal Line Highway From Redondo Is Urged

VENICE, April 14.—Construction of the state coastal highway link from Redondo to San Pedro via Palos Verdes was advocated by the Venice chamber of commerce in a resolution adopted last night.

Last Chance !!!

ROSSMOYNE

THE "HAPPY LAND"

THIS IS POSITIVELY THE LAST CHANCE the people of Glendale and vicinity will have to get in on this choice property at Pre-Opening prices!

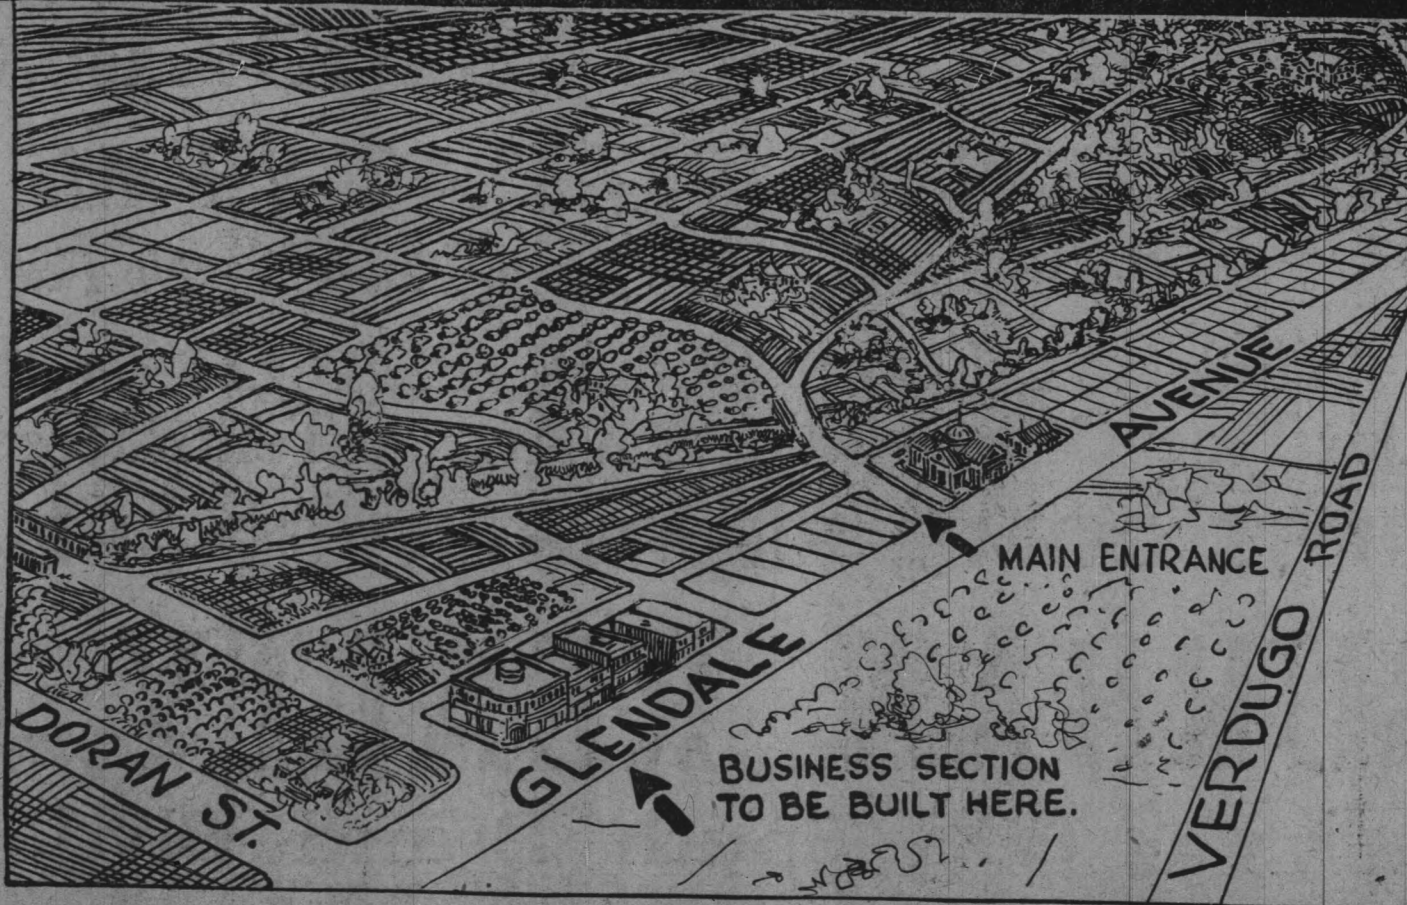

THOUSANDS OF PEOPLE have been waiting eagerly for this property to be put on the market, and the present prices at which it is being offered are far below the worth of the property as it stands today.

PRICES POSITIVELY ARE GOING TO ADVANCE!

UNUSUAL ACTIVITY ORNAMENTAL FRUIT IN GLEN ANGELES LOTS FOR THE HOME PLACE

Rain or shine, sales in the Angeles tract continue. Since this tract was opened, sales have been made daily. Even during the rainy days, prospective buyers flocked to the tract and placed their initial payments on one or more of the beautiful homesites.

"I have handled subdivisions in many parts of this country," said T. P. Fay, sales agent for this tract, "but never have I put on a tract that sold as this one is selling at this time. The only reason for this activity, as I see it, is that there is real value in every lot, and that the prices are right."

The owners of this tract declare that those who purchase there are sure to reap big rewards in the way of increased valuations. This tract has everything a high-class subdivision should possess in the way of public utilities. It has location, an abundance of fresh air, for which the city folks are searching, and a view that it would indeed be hard to surpass.

Glen Angeles tract is located right. It is served by two bus lines, both of which make the trip to Fifth and Broadway, Los Angeles, in the short space of twenty-five minutes. Brand boulevard, with its electric cars is only a short walk away.

Glen Angeles tract will be especially benefited by the opening of Goodwin street, running through it to connect with Riverside drive, making the distance to Los Angeles by auto shorter by fifteen minutes. Lots in this tract are being sold with a "money-back" guarantee. If for any reason the purchasers in this tract are desirous of securing the return of their money, the management will cheerfully refund the money paid. This demonstrates conclusively the faith and confidence the owners of this tract have in their property.

Lots in this tract, 50x130 feet in size, are selling now for \$800 to \$1100. It is predicted that these prices will advance at least 25 per cent within the next ninety days. A reasonable payment down will be accepted on any lot, with the remainder to be paid in easy monthly installments.

Fans of Metal Lace

Fans are astonishingly versatile in character, and among the most beautiful new fans are large ones made of metal lace which have designs in color. They are extremely effective, and when carried with a frock of dark velvet strike a vivid note of color.

The fruit of the loquat is familiar to most people who have spent any time in California, but, as in the case of most fruiting plants, its value for ornamental use is seldom considered.

The reason why most fruit trees are not thought of in terms of ornamental use is probably because we are accustomed to seeing them in orchard form and because many of them require the extra cultural care that is given to the average orchard.

Although the loquat demands practically the same amount of water to bring it into its best bearing as does the orange, it is considerably more drought-resistant than the citrus fruits and can be grown as a satisfactory ornamental plant under conditions of considerable neglect.

In California, our season of natural rainfall comes at the time when the loquat is most in need of moisture to mature its fruit, a fact much in the favor of this plant.

An interesting characteristic of this tree is that it blossoms in the autumn, develops its fruit during the winter and ripens them in the spring (during May and June), which is the reverse of the fruiting habits of our more common orchard crops.

The loquat flowers are highly fragrant, white, about a half an inch in breadth and are borne in terminal clusters.

The fruits occur in loose clusters, vary in color from a clear yellow to a deep orange, and may be round, oval or pear-shaped.

The skin is smooth and relatively thin, the flesh firm and crisp, very juicy and pleasingly subacid in flavor.

The seeds occur in the center of the fruit, are light brown in color and about three-fourths of an inch long.

The appearance of the loquat tree is ordinarily rather stiff and formal, due to its stiff and angular habit of branching and to the heavy and rather rigid leaves.

It is a small tree, growing from 20 to 30 feet high, with a short trunk from which branches usually appear quite close to the ground.

It grows compactly, taking a round or oval form of naturally formal appearance.

The leaves are thick and harsh, a very deep green above and gray and woolly beneath and grow from six to ten inches long.

The branchlets are very woolly, stout and unyielding.

This tree is much grown throughout the tropical countries, in China,

Brennan in Hospital
After Firpo Bout

Bill Brennan

and in Japan, where it has been cultivated for centuries.

It is now widely established in America.

It withstands a temperature as low as ten degrees, although a slight freeze, coming at the proper time, may destroy the fruit crop.

For fruiting conditions, the coastal districts offer the most satisfactory conditions, but, if planted as an ornamental, it has a wide range of locality in which it will thrive.

The loquat may be well used in gardens when a formal tree is desired, or where accent of a certain form is sought.

In the garden which combines utility with thoughtfulness and taste in arrangement, the loquat may well serve the double function of accentuating a recognized formality and of contributing its share to the annual harvest of fruits.

The blindness of pups and kittens ends in nine days. Men and women are very different.

HERE ARE SEVERAL NEW TYPES OF POPPIES

Remarkable strides have been made in the last few seasons in developing that very handsome and easily grown annual, the poppy, both in the Shirley and opium types. As poppy seed may be sown in midwinter with excellent prospects of a fine, early crop of blooms there need be no delay in getting the poppy bed started.

In the favorite Shirley type, there are new selections of delicate shades in salmon and pink which will prove revelations. A new wild rose pink type will add to the glory of the poppy bed this year. It comes into bloom very early from fall or wintertime seeds and a bed will be ablaze in June from seed scattered now. As this type of poppy does not bear transplanting, the seed should be sown where the plants are to be grown. The seed should be mixed with twice or more its bulk of fine sand to scatter it. After germination the plants should be thinned to a foot apart. The size of the blooms will be greatly increased, and each bush will produce a much greater crop of flowers if given room to develop. The fading flowers should be picked and no seed pods allowed to form, as the development of seed pods means the end of bloom.

Considerable attention has been given to the heavier growing, more robust and gorgeous opium poppy. Here they rival the peony in their huge and richly colored blossoms, some delicately fringed and tipped with brilliant colors on a white ground.

The Ryburgh hybrids, one of the latest developments, are distinct from the older carnation and peony types in having flat petals suggestive of the tuberous begonia. They are more easily transplanted than the Shirley and if cut when the bud first splits will expand in water and make handsome bouquets.

The range of colors is entirely new and distinct for this class of poppy, embracing pinks, salmon and orange shades. No more brilliant bed of quick and easily grown annuals can be planted than annual poppies.

Corded Black Satin Capes. New and extremely smart are long capes of corded black satin. These are lined with squirrel and the collars are of fox or wolf.

Net Handkerchiefs. Charming little novelties are handkerchiefs of the finest net edged with real Biche or Valenciennes lace in black.

Our memory seems to tell us that we need some draperies, a new rug or two, a couch swing, porch furniture, new dishes, a good reading lamp, and just any number of things that will be useful in our summer home.

This rejuvenating process is always a joy because it is pregnant with creative possibilities of transforming the coziness of the winter fireside to a cool and airy atmosphere for spring and summer.

Some thought must be given to the freshening up of the sea-side cottage and mountain cabin.

Our memory seems to tell us that we need some draperies, a new rug or two, a couch swing, porch furniture, new dishes, a good reading lamp, and just any number of things that will be useful in our summer home.

ALMOST TIME TO SHADE SELECTION SPRING CLEAN THE HOME

How splendid it is that the spirit of rejuvenation creeps into the heart of every housewife as spring unfolds her carpet of green, and her mantle of leafage and blossom.

With the keen interest that is being manifested in the beautifying of the home, no alert woman could have lived through the winter months without assimilating some splendid new ideas that she wishes to make manifest in her spring renovation.

At this season it just seems the natural thing to go over the house, and see what it needs to make its dress comfortable for the spring and summer.

The walls, floor coverings and draperies should be given special attention and freshened up and renewed wherever they are found faded or shabby.

A good plan is to go from room to room and study the salient points, developing each center of interest carefully from three angles: first, how can I make this room more useful; second, more comfortable; third, more beautiful.

For utility, you may need end-tables, lamps, possibly a piece of furniture or two; for comfort, an overstuffed chair, day-bed, stool, day-bed, or chaise-lounger; then for beauty may be added bowls and baskets for flowers, pictures, pottery, and any number of things that lend inspiration and atmosphere to the room.

It is nice to take down the heavy velvet and damask draperies, and replace them with figured linen or some lighter weight textile, and cover the overstuffed furniture with linen or cretonne slip covers; then make the sun and breakfast room just radiate joy and happiness through colorful draperies, furniture and flowers.

Some thought must be given to the freshening up of the sea-side cottage and mountain cabin.

Our memory seems to tell us that we need some draperies, a new rug or two, a couch swing, porch furniture, new dishes, a good reading lamp, and just any number of things that will be useful in our summer home.

THE SELECTION OF WINDOW SHADES DEMANDS CARE

The selection of window shades for the home, instead of being thought of as a minor matter to be hurriedly decided upon at the last minute, should be considered as important in the home as any of the materials used in its construction.

For the window shades are really an important part of the home, as much so as the plumbing or any of the other fixtures, and much care should be exercised in their selection.

The texture of the cloth being the base of a window shade material, and the deciding factor of its quality; call one's direct attention to the superiority of the window shade material known as unfilled cloth.

In the manufacture of this kind of material only the finest and closest woven muslins are employed, thus obviating the necessity for the use of chalk or clay to give the cloth body before the coloring matter is applied.

This material can be procured in a number of soft pleasing tones, of sufficient variety to enable one to make a selection that will harmonize with any of the various interior or exterior finishes now used.

I would recommend the serious consideration of this beautiful and well wearing material to any one in the market for window shades.

Not only is the material of window shades important, but the same thing is true of the workmanship employed in assembling the materials used, as poor workmanship may serve absolutely to spoil the effect of an otherwise beautiful shade material.

This, of course, can be avoided by dealing with a reliable firm that employs only skilled mechanics.

The care of a window shade after its purchase and installation is a point that most people entirely overlook.

So often you may have heard some one say, "My shades do not roll straight."

I have found that the general cause of this is the fact that most people do not give the shade a fair chance to roll straight.

In rolling up a shade it should be grasped by the crochet pull, or metal ring, that is placed in the exact center of the shade for this purpose, and a reasonable amount of care exercised to try to help the shade roll true.

But if one makes the common mistake of taking hold of the shade at the side of the hem and trying to raise it without even looking in that direction, why even the most

HIGHWAY WILL BE 35 MILES LONG

Thirty-five miles of "Children's Highway" planted by its thousands of school children is the tremendous task for which Kane county, Illinois, is rallying its entire citizenry.

In towns along the state road from Aurora to Algonquin, chambers of commerce, Kiwanis, Rotary and Lions clubs, Women's clubs, schools, societies, churches, lodges—all available agencies are organizing themselves for one great collective effort: the beautifying of the Fox River valley with the planting this spring of a tree, a shrub

nearly perfectly made shade will in most cases fail to roll true.

If a shade is rolled up crookedly and allowed to stay in that position for any length of time, the cloth will set to the roller in that shape and make it difficult to roll that shade up from that time on, especially if the shade be fairly new at the time this happens.

A little time taken to dust shades once in a while, the same as furniture, will keep them from having unsightly dust streaks burned into the cloth from the action of the sun on the accumulated dirt that always results when shades are neglected.

On one day during Tree Planting week, there will be held a great community day of planting, with a special program and representatives of the press and film companies there to spread the gospel that Kane county, Illinois, will be the first to take steps in beautifying America in this manner.

It was in Aurora, Illinois, that the "Plan to Plant Another Tree" originated, and it is interesting and fitting that Kane county should lead in this plan of planting a "Children's Highway."

or a flower for every man and woman, boy and girl, in Kane county. The planting of the Fox River trail is one of the major plans of the Plan to Plant Another Tree club of Kane county, which has been formed this spring. Each child or group of children planting a tree or shrub along the highway, will be given the responsibility of its care under adult leadership, until growth is assured.

Several hundred organizations of the cities and towns of the county—Aurora, Elgin, Algonquin, Dundee, Geneva, St. Charles, Batavia and Carpentersville—are joining in the task. A prominent Chicago landscape architect is mapping out a plan for the planting. A fund of \$20,000 is being raised by popular subscription to finance the effort and enthusiasm is at high heat all over the county.

On one day during Tree Planting week, there will be held a great community day of planting, with a special program and representatives of the press and film companies there to spread the gospel that Kane county, Illinois, will be the first to take steps in beautifying America in this manner.

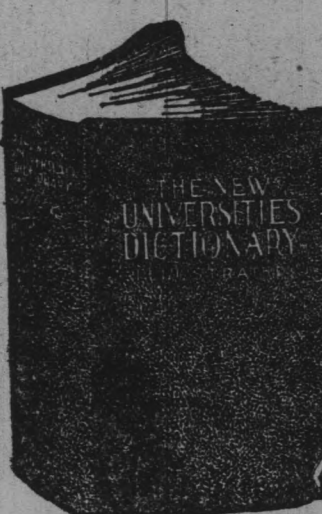

It was in Aurora, Illinois, that the "Plan to Plant Another Tree" originated, and it is interesting and fitting that Kane county should lead in this plan of planting a "Children's Highway."

WONDERFUL VIEW TRACT, NORTHEAST OF GLENDALE, GETS MUCH NEEDED FEATURE OF EDUCATION

This Latest Improvement Is One Which Makes
Flintridge Complete; It Now Has Everything the
Lover of a Beautiful Home Desires

With the approaching completion of the Flintridge school, which will be ready by the opening of the September term, comes announcement of the installation of a new Flintridge community playground to be generously fitted with modern playground apparatus, including sand boxes, swings, slides and equipment for games.

This new appointment will make Flintridge more than ever a "paradise for children." Flintridge is an ideal community in which to rear children because the environment is uniquely suited for happy, healthful youth. The whole some, out-of-doors life of Flintridge contrasts strongly with vitiated atmosphere of the city.

It is a notable fact that many of the new residents who are just now establishing themselves in Flintridge, were most strongly drawn to Flintridge by the many advantages it offers to children. Real estate promoters frequently announce that their holding combine "country advantages with city conveniences." At Flintridge this combination has been effected in the interests of children in a most real and happy way.

The Flintridge school and playgrounds, in connection with regular bus service to neighboring high schools, meet the most exacting educational requirements, while the oak-studded hills and dales of the Flintridge parkland offer the recreational opportunities that are equally essential to growing children.

OUTLOOK FOR LABOR IS GOOD

In a survey of the general labor situation of the building industry throughout the United States, S. W. Straus & Co. say:

"Indications at the present time are general that labor conditions in the construction industry are conducive to a continuation of building activities on a large scale.

"Wages are becoming stabilized with general tendencies toward slightly higher levels in some localities and there appears little probability of any retarding development during 1923.

"Wage adjustments have reached a hopeful stage and in the most important centers are proceeding with success.

"Neither union labor nor the employer appear to show any disposition to bring about radical changes in existing wage scales.

"In some cities employers have agreed to slight advances.

"This is resulting in the gradual elimination of the bonus scales, except in some of the large cities

FIXTURES OF HOME NAMED

The confusion which exists among the manufacturer, designer, dealer and the public as to the names and what constitutes the different luminaires makes it desirable to standardize terms and descriptions for the luminaires commonly used, says Home Craft, a monthly magazine published in Los Angeles.

Luminaires supported by the ceiling may be divided into two classes, those fitted close to the ceiling are to be termed ceiling-type luminaires, while the remainder, using chains, tubular or solid stems, cords and the like, are termed suspension type.

Bowl—A bowl-shaped luminaire used to produce so-called semi-indirect or totally indirect lighting. Usually a predominant component of light is emitted upward.

Shower—A luminaire consisting of two or more lamps hung in a downward position.

Rosette—A luminaire fitting close to the ceiling consisting of

Bowl and Shower—A luminaire which is a combination of the bowl and the shower.

Including Globe—A luminaire the material of which, regardless of shape, entirely envelopes the light source.

Bracket—A luminaire fastened to the wall or to an article of furnishing.

Portable—A luminaire such as the floor lamp and table lamp, which is readily moved without need for fastening it to other objects.

Convenience Outlet—A finished outlet in the wall, baseboard, floor, article or furnishing, etc., to which portables and appliances may be easily attached.

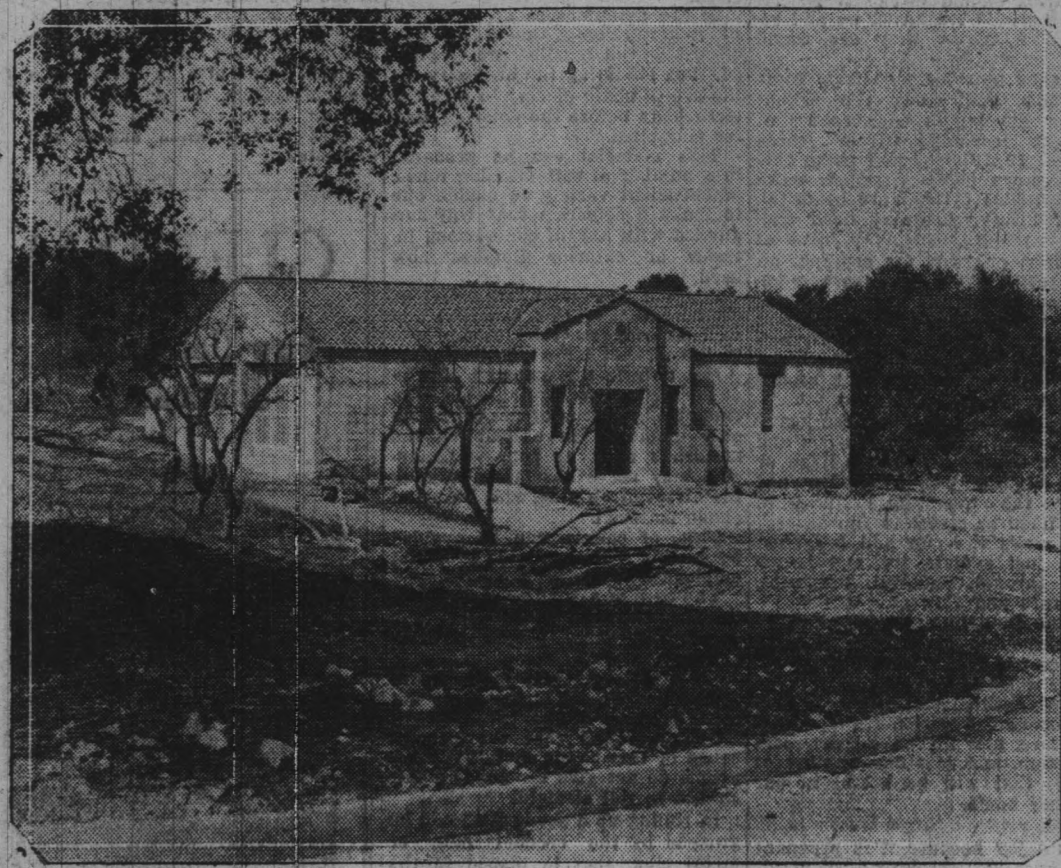

Quilted Negligees

As attractive as they are warm are quilted negligees of satin or taffeta, which are reasonably priced.

Smart Velvet Evening Capes

Velvet evening capes in bright shades of blue and coral are ornamented with conventional motifs done in tiny steel heads.

BEAUTIFUL NEW GRAMMAR SCHOOL WHICH HAS HAS JUST BEEN FINISHED AT FLINTRIDGE

and isolated localities where there is an insufficiency of skilled mechanics to take care of the work now in hand and in prospect.

"While demand for labor during the last month has not been acute, heavy winter construction work is keeping building labor from its usual reasonable layoff, and there are but a negligible number of men idle because of inability to get employment."

Candelabra—A luminaire consisting of a number of light sconces mounted as upright imitation candles.

Dome—A luminaire consisting of large shade with a wide opening at the bottom, directing all or a large part of the light downward. This luminaire can be considered as the reverse of the bowl.

Blouses of Bandanna Handkerchiefs

To give a touch of color to the dark tailored suit are the smartest blouses made of mandanna handkerchiefs.

Attractive Topcoat

A new and extremely attractive topcoat is made of a shaggy plaid in tones of brown and tan. The collar is of fur.

FLINTRIDGE

"Southern California's
Choicest Residential Park"

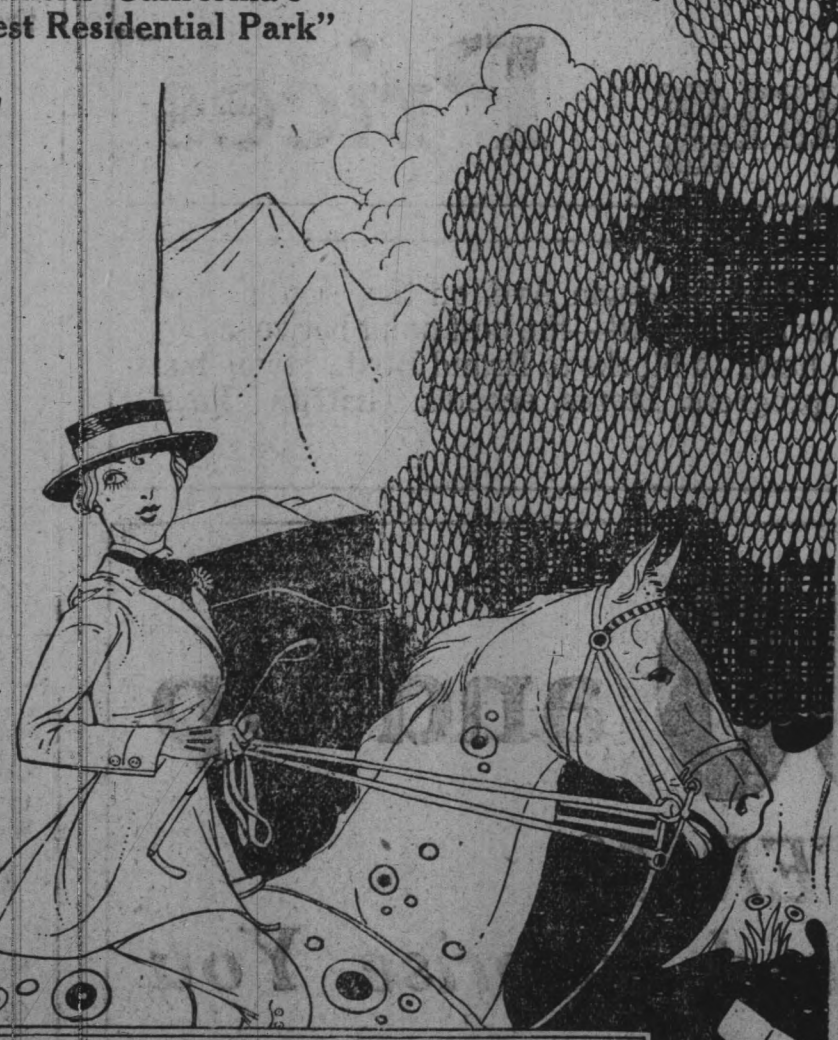

Why Be Satisfied With Less?

—when Flintridge homesites are being offered at less per acre than is being asked in undeveloped "subdivisions."

—when completed homes in Flintridge are available at terms and prices to suit the most modest purse.

—when all the conveniences and mature development of Flintridge are ready for your use and enjoyment without pioneering or expense.

Watch for important announcement next week concerning interesting new developments at Flintridge.

This advertisement appears only in Glendale papers this week—Tear out this ad now and bring it with you.

ALL RECORDS BROKEN BY REO SIX IN L. A. PHOENIX DASH

**C. H. BIGELOW, VETERAN DRIVER,
SENDS POWERFUL CAR OVER DESERT
ROUTE AT 'A PACE THAT KILLS'**

Fifteen Years Ago Same Driver Laid Out Route That Was Traversed Saturday; Oldfield's Record, Twelve Years Old, Is Broken

Charles H. Bigelow, veteran road engineer and automobile man, laid out the old Los Angeles to Phoenix course some fifteen years ago. At that time the two cities were connected only by mere paths through sand and over rock-strewn desert washes. Last Saturday Bigelow, driving a seven-passenger Reo six-cylinder stock car, fully equipped with top, windshield and fenders and carrying a load of four passengers, together with their baggage, broke all records over the long route by way of Needles, Seligman, Prescott and Wickenburg by a margin of one hour and 26 minutes.

Barney Oldfield, who won his famous title of world's "Master Driver" in the Los Angeles to Phoenix event of ten years ago had previously held the record of 22 hours, 44 minutes. This was made with a stripped racing car under road racing conditions. Bigelow's time in the Reo was 21 hours, 18 minutes, thus clipping 1 hour and 26 minutes off the former mark.

The distance of 671 miles to the Phoenix fair grounds was over highway to Victorville, then across the desert to Needles, and on up through the mountains of northwestern Arizona by way of Kingman, Seligman, Prescott, Wickenburg and Hot Springs Junction into Phoenix.

The Reo left Lincoln park in Los Angeles at midnight Friday night, March 30, and arrived in Phoenix at 9:18 p. m., Los Angeles time, Saturday night. The elapsed time of 21 hours, 18 minutes, included a stop of ten minutes at Ludlow where Dave F. Fassett, service manager for the Reo Motor Car company of California and a veteran driver with experience dating back to 1905 at which he drove a Reo two-cylinder twice across the continent on a double-transcontinental record trip, turned over the wheel to Bigelow who drove from then on into Phoenix, and also a 10-minute stop at Wickenburg where a tire was changed. Other stops of shorter length were also included in the total time.

Representatives of Los Angeles and Phoenix newspapers rode as passengers on the trip and checked the time made and the route, while Chief of Police Roberts of Phoenix assigned Motorcycle Officer L. C. Higginbotham to meet the Reo at the fair grounds and escort it through the city to the Hotel Adams, where it was met by Manager T. F. Skelley of the Reo factory branch in Phoenix which was formally opened on Saturday night. Traffic officers were stationed at all important crossings from the fair grounds in and Officer Higginbotham, with siren going full blast, led Bigelow through the city at full speed.

The car was stock equipped except for Hartford shock absorbers and Goodrich Silvertown cords, the latter standing up in great shape, the only tire trouble experienced despite the terrific road conditions met on several of the stretches, being a puncture out of Needles and a blow-out resulting from a rock cut when the car

swerved to the side of the road just north of Wickenburg. The treads showed little or no wear when the car was driven into the Reo service plant in Phoenix.

Mr. Bigelow is the holder of several long distance records and last year established new marks with a Reo for the L. A. and Phoenix round trip and the long grind from Salt Lake to Los Angeles. The trip over the northern route was made, according to Bigelow, to discover if possible any weakness which might develop and to test out thoroughly the power and stamina of the car. He told the writer, and this was borne out fully by statements from the two newspaper observers, that no special attempt was made for speed in California, but that the car was pushed to capacity over some of the roughest stretches of desert road. A speed of 70 miles an hour was reached at one point, and of 68 miles an hour on another stretch, according to the observers.

Particularly good time was made on the last stretch from Wickenburg to Phoenix, the Reo negotiating the distance in 2 hours, 26 minutes, while the fast train requires about 3 hours, 45 minutes for the trip by rail over a somewhat shorter route.

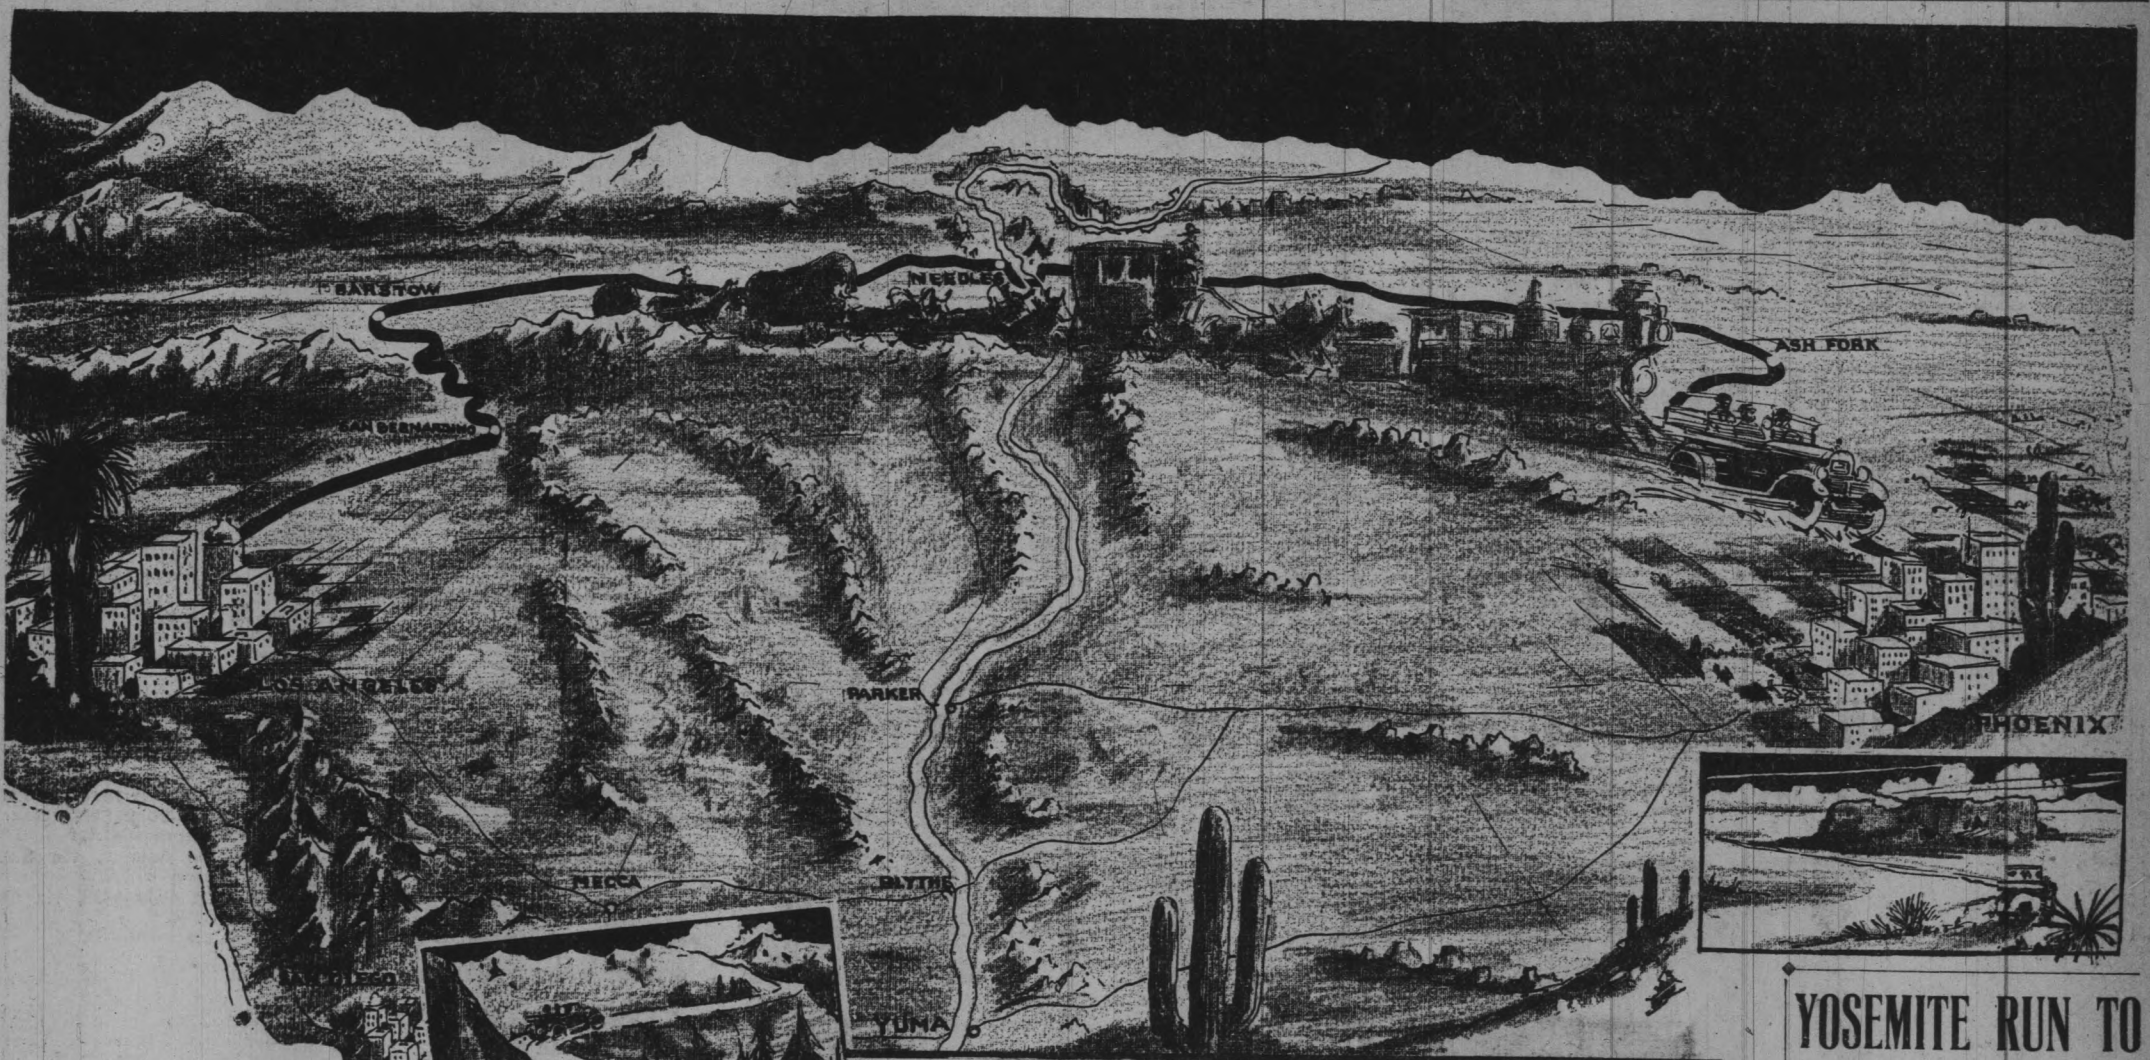

The record-breaking car is now on display at the Reo branch in Phoenix.

ELECTRIC AUTO CLOCK IS HERE

Among the newest features of the 1923 equipment of passenger automobiles is the adoption of the electric clock, a device that is operated by the current of the storage battery. These clocks take so little current as to hardly register on the ammeter. They are also accurate, and are not affected by vibration or weather conditions.

AUTOS SECOND TO AGRICULTURE

In total value of output the automobile industry is now second only to agriculture. Its estimated output for 1922 was \$2,725,000,000. The industry requires 80 per cent of all the annual production of gasoline and 81 per cent of the crude rubber imported. Of the 12,704,000 employees supported by industry and transportation, 13 per cent depend on the automobile industry.

National Old Trails Highway near Hawkesberry, Arizona.

AUTO CLUB PLACES MANY NEW SIGNS

Motorists who travel through Southern California will find a flock of brand new signs on many roads in the near future, according to a notice just issued by the Auto Club of Southern California.

Plans are now under way to re-sign the route leading from the southern part of the state to Carson City, Nevada, by way of the Owen Valley Road. This important route will not only be marked with direction signs but the club will indicate the names of all tributary roads leading into it and creeks which cross it will be named correctly on the signs.

The coast route from Mexico to the Monterey County line in the north has just been completely re-signed and is in such condition that eastern visitors in California can find their way along its entire length with no difficulty. The inland route is completely re-signed now from Los Angeles to San Diego.

Word has just been received here from the sign posting department of the Auto Club that the coast highway in Mexico from Tia Juana to Ensenada, a distance of ninety miles, is in passable condition if there has been no rain. The sign posting crew has just finished placing the brand new signs in this "foreign" territory. Although the Mexican road is not difficult to follow, the club believes that on account of the large number of sportsmen traveling in lower California from the United States it is very important to have dangerous curves and short detours marked with official signs.

Crews have just completed surveying Riverside, Orange and San Bernardino counties for new road signs and maps. Every road in these counties which is passable to motorists will be marked. At the present time an extensive survey of San Diego and Imperial counties is being made for new maps and new road signs which will completely cover this district.

FEW KNOW NUMBERS
According to records, only about thirty out of every 100 automobile owners know their own license

LATEST ROAD DOPE TO MOUNTAIN LAKES

Arrowhead Lake: One of the Auto Club's cars covered the Arrowhead Lake region Sunday, March 25, and reports that the new road from Hesperia to the lake offers especially good going. It is a distance of 21 miles from Hesperia to the club house at the north end of the lake. From the south side of the dam past the Camp Ground and Fleming Grove to Arrowhead Village a considerable amount of mud caused by melting snow was encountered. This same muddy condition continues from Arrowhead Village out past the P. E. Vacation Home and almost to Strawberry Flats. The Waterman Canyon road offers fairly good going, although the storm drains which are about every 100 yards apart, make travelling uncomfortable. The grades on the new road are not as steep as on Waterman Canyon but numerous sharp turns and narrow roadway will be found. There are very few places where cars can pass but no doubt a control will be put into effect on this road during the summer. The Rim Road is open for a distance of approximately six miles from Pine Crest, not being advisable beyond that point. In making the trip to the lake at this time either via the new road or by way of Waterman Canyon it is not necessary to use chains although in some of the muddy places some little difficulty may be encountered.

Big Bear Lake:—The only route possible at present is via Victorville, which is in splendid shape. No difficulty whatsoever on the Cushmanberry and Johnson Grades.

SIXTEEN STATES HAVE GAS TAX

The gasoline tax is now a law in sixteen states—Arizona, Arkansas, Colorado, Connecticut, Georgia, Kentucky, New Mexico, North Carolina, Oregon, Pennsylvania, South Carolina, South Dakota and Washington. In all cases the rate is one cent a gallon except in Oregon, Maryland and South Carolina, where the rate is two cents.

U. S. GAS CONSUMPTION
While the daily consumption of gasoline in the United States was estimated that an average of 2,000,000 gallons will be used daily during

DIFFICULT NOW TO SELL STOLEN AUTOS

ST. LOUIS, April 7.—"Low price levels for new automobiles are rapidly eliminating the possible market for stolen motor vehicles," says C. A. Vane, general manager of the National Automobile Dealers' association, and suggests that will have a tremendous influence toward reducing the number of thefts. The N. A. D. A. has completed a compilation of their records for 1922 which shows improvement in the matter of recoveries as compared to the thefts and recoveries in 1921. Reports from 28 "index" cities for which complete five year figures have been kept by the National Association show that recoveries in 1922 were 78 per cent of thefts reported to the police departments of those cities.

"New cars have reached a low price level in 1922 and 1923. It is now possible to buy a new automobile for about the price that a person would have to pay to a thief for a stolen vehicle. The selling prices of used cars have settled down to an average of about \$350 a car. The automobile thief steals for profit. If his market has been changed to where he must sell for less than \$350 there will be little reward for so much risk. Taking the profit out of his efforts, almost automatically takes his incentive away."

Records of 28 cities disclose that 35,333 motor vehicles were stolen in 1922 and 26,511 recovered. The number unrecovered was 22 per cent which is the best record made by the police departments since 1918 when 21 per cent were unrecovered.

Buffalo recovered 37 motor vehicles stolen in other cities, Oklahoma City recovered 46, Cincinnati 49 and Boston 2. Boston also recovered 54 cars in 1922 which were stolen in previous years.

SAFETY FIRST
A motorist at no time should have both hands free of the steering wheel. Small stones, ruts and bumps will quickly disturb the equilibrium, and throw the car in the ditch.

YOSEMITE RUN TO OCCUR MAY 18 AND 19

Test Will Take Place One Week Later Than Last Year

The annual Yosemite economy run will be held May 18 and 19. This has just been announced by J. A. C. Walter, manager of this year's run.

Being scheduled practically a week later than the run last year, the 1923 contest is expected to be conducted under much more favorable road conditions than those encountered either last year or in first tentatively suggested, were given up primarily on that account.

Although no definite decision has been made as to the rules governing this year's event, it is estimated that there will be no material changes over those in force last year. Due to the rearrangement in the price classifications of different cars that has manifested itself since the 1922 contest, however, it is the belief of Mr. Waters that some plan will be effected involving the addition of another class in the competition in order to make possible a fair and proper distribution of the entries.

UNDER A. A. A.
The Camp Curry economy run, as it has come to be known throughout the automotive world, is conducted under the sanction of the American Automobile association. The contest board of that organization, in formulating the fundamental

(Continued on Page 3)

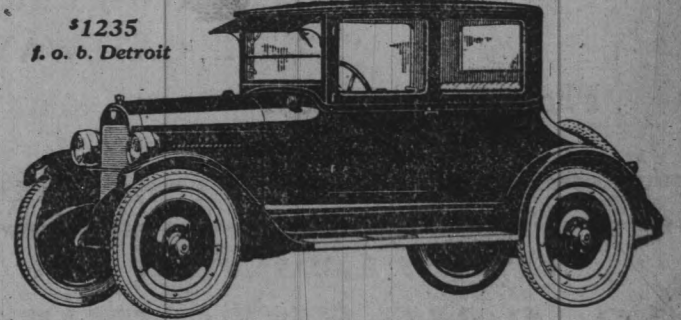

Oldsmobile wins by comparison.

Eleven people in Glendale compared the Oldsmobile with the market and now own Oldsmobiles.

The Olds may be just the car you want.

It costs nothing to compare. Drop in at 208 West Broadway and see for yourself.

C. H. Hunter. 208 West Broadway. Glen. 2373

The public was quick to recognize in the good Maxwell, value expressed in such terms of beauty and quality as it had never seen before. The exceptional performance of this fine car in the hands of owners, as well as its ease of riding, has strengthened immeasurably the conviction that the good Maxwell is without a serious rival.

GLENDALE MOTOR CAR CO.
124 WEST COLORADO STREET

The Good
MAXWELL

MONARCH AUTO TO PUT ON BIG TIRE SALE

Tire buyers, here's your chance. One of the biggest tire sales ever held in Glendale will occur between 7:30 and 12 o'clock Monday morning. During those four and a half hours the Monarch Auto Supply Company, 204 South Brand, will give a discount of 15 per cent on cash purchases for any Goodyear, United States, Keaton and Lancas-

ter tire in the store. Every tire that is sold will carry the usual guarantee that each respective tire carries. This special offer is good for Monday morning only. It is about time to wear out your old tires. The fellow who is planning to spend a good part of his spare time in the mountains this year is well aware of this fact. The mistake some people make is to plan to "wear out their old tires on the camping trip." They make this mistake only once. The next time they go out they fit the old, beat with a set of "brand new," so as to assure themselves an enjoyable trip. For this reason the automobile owners of Glendale should plan to take advantage of the wonderful bargains the Monarch Auto Supply are offering for Monday. Every tire that will be offered is

brand new stock. There isn't an old tire on the shelves of this store and every tire that will be sold will be worth at least 15 per cent more than the price asked, the tire buyer will save the rest. Tire prices are going up. The wise buyer will stock up now, rather than wait for further advances. **AN EASY WAY TO ATTACH-SKID CHAINS** Chains can be placed on wheels without the use of a jack by stretching them on the road in the rear of the car, so that they will be in line with the wheels. The car can be moved back a few feet until the ends of the chains are brought to a convenient position for hooking them together.

Anaheim to Artesia, via Valencia Street—Paved; closed to Long Beach.
Santa Ana Canyon road—Paved.
San Juan Capistrano to San Juan Hot Springs—In poor condition but passable.
Trabuco Canyon Road—Dirt road, rather rough and chucky.
Carbon Canyon Road—Dirt road, rather rough in places.
Brea Canyon—Paved.
Fullerton to Norwalk, via Buena Park—Paved.
Irvine Station to Laguna Beach—Paved.
Miscellaneous roads—Talbert Bridge on Huntington Beach, Talbert Boulevard, closed on account of repairs. Detour around bridge closed on account of water in river. Detour out of Santa Ana starts at Greenville turning south (or to the right), then on Fairview Road. Otherwise take West Fifth street, paved road, to Huntington Beach, out of Santa Ana.
Ventura District
Ventura to Sausalito, via Santa Paula, Fillmore—O. K.
Ventura to Calabasas, via Conejo grade—O. K.
Coast Route north—O. K.
Casitas Pass road—Reported to be in good condition—dirt and slightly rough in places.
El Rio to Oxnard—O. K.
Oxnard to Oxnard—O. K.
Santa Susana route—O. K.
Grimes Canyon—Rough and full of holes, dangerous in wet weather.
Ventura, Ojai, Wheelers Hot Springs—To Ojai paved—Ojai to Wheelers in good condition.
Santa Paul to Ojai—Paved with exception of 4 miles. Fair dirt and oil road.
Sequoia River road—Fair, paved for one and one-half miles, balance fair.
Pasadena District
Arroyo Seco road—O. K. to Oak Wythe.
Mount Wilson road—O. K. Usual controls on Sunday.
Lamanda Park to Pasadena—O. K.—Private road.
Sierra Madre canyon—O. K.
Altadena to La Canada, via Devils Gate—Good pavement.
Pasadena to Glendale, via Colorado Street bridge—Paved. No detours.
Linda Vista avenue to Devils Gate—O. K. No heavy loads. 10 miles speed limit on Linda Vista bridge.
Millard Canyon road—O. K.
Busch Gardens—Open, 25c admission. Proceeds to Pasadena hospital.
Long Beach District
Long Beach boulevard—O. K.
Long Beach to Wilmington—O. K.
Long Beach to Santa Ana, via Seal Beach—Rough between Seal Beach and Westminster. Rest of road O. K.
Long Beach to Los Angeles, via Clearwater, Downey—Closed. Under construction.
Long Beach to Garden Grove, via Long Beach road—Paved to intersection of Los Alamitos road. Good dirt road from there on.
Seal Beach to Artesia, via Los Alamitos—O. K.
Santa Barbara District
Las Cruces to Lompoc—Fair dirt road, rough in places.
Lompoc to Harris station—Fair dirt road, rough in places.
Zaca to Santa Maria, via Siquioe—Fair dirt road, rough in places.
Lompoc to Point Conception—Not advisable.
Solvang to Lompoc, via Santa Rita—Paved.
San Marcos pass—Closed, under construction.
Zaca to Zaca lake—Zaca lake closed to the public.
Refugio pass—Not advisable.
Miscellaneous roads—Good.
CORD TIRE IS STRONGEST
The construction of a cord tire is such that the strings which make up the body of the tire are much more perfectly surrounded by rubber than is possible in a fabric tire. This prevents internal friction, keeps down the heat and gives longer life. The strings which run at least in four layers, and are according to size of the tire, are of great strength, while the warp and wool of a fabric are loosely twisted yarn. This is a most important feature, and is one of the reasons why cord tires are stronger than fabrics. With internal friction reduced a cord tire can be run somewhat softer than the fabric of corresponding size; this gives more resiliency, less car vibration and more comfort.

HOW SLOW

Will Your Car Go
IN HIGH GEAR?

27 MILES—24 HOURS!!

1 1/10 MILES PER HOUR FOR 24
HOURS IS WHAT THE

REO

did last week in an unofficial test at the Los Angeles Speedway.

This test run was made as a sort of "Dress Rehearsal" with a view to an official run for the purpose of breaking the world's record, established several years ago, of 2.8 miles per hour for 24 hours.

The Reo Six touring car which made this remarkable showing was strictly stock in every particular and the motor was not stopped during the 24-hour test.

While the average speed maintained during the test was 1.3 miles per hour, many laps were made in much slower time, one mile-and-a-quarter circuit being made at the remarkable slow speed of 6-10 miles per hour.

At the end of the 24-hour period, and without adjustment of carburetor or any changes being made, the Reo was driven around the track at an average speed of—

55 Miles Per Hour

When the Engine Misfires at Low Speeds Only or Will Not Run Slowly When Idling

And Ignition, Plugs and Valves Have Been
Tested as Shown in Articles Six and Seven

NOTE—If the engine is COLD, let it run for five minutes to warm up thoroughly. Most engines will misfire a little in cold weather until they are warmed up. If the engine is warmed up, and runs as above then—

Examine the Carburetor—
If Gasoline is leaking BADLY from it, see A.
If Gasoline is NOT leaking from it, see B.

A
1. Grasp the Float Valve and raise it up and down, allowing the gasoline to flush out the seat, giving it a half turn back and forth as you do so. If the leaking STILL continues then—
2. Hold the Float Valve firmly on its seat, and GENTLY tap it with a small hammer or the end of a wrench two or three times, giving it a half turn round each time as you do so. This will usually result in making a new seat. Be VERY CAREFUL you do not hit hard or you may bend the Valve. If the leaking STILL continues then—
3. Turn off the gasoline and take out the Float and Float Valve, to see if it is rough or badly ringed. If it is, it requires facing up, a job for the Service Station or the makers of the Carburetor. If the Valve and Valve Seat look all right then—
4. If the Float is a metal one, shake it to see if there is any gasoline inside. If there is it can be repaired by immersing it in very hot water until no more bubbles arise, noting the spot where they came from, then with a VERY SMALL soldering iron, apply just a tip of SOFT SOLDER. An iron too hot will open up the seams of the Float beyond repair, and too much solder will throw the Float out of balance. It is always better to buy a new Float than try to repair an old one, and above directions are given where this fault develops and it is impossible to procure a new Float.
If the Float is made of cork, see if it is not water soaked. It should be quite dry. If it is NOT, then dry out and give it two coats of this shellac.
If both the Float and Float Valve appears to be all right, yet the Carburetor continues to flood, then—
5. The gasoline level in the Float Chamber is too high. It should stand approximately 1/32" from the top of the jet. To test accurately and remedy this defect requires special knowledge of the Carburetor, so have this trouble remedied by the Carburetor Service Station.

B
1. Take out all Spark Plugs and examine the gaps to see they are set correctly. They should be just a trifle LESS than the thickness of a WORN DIME. If they are all right then—
2. Test the Joints on the Intake Manifold by flowing a little gasoline around them, noticing if it makes the engine run any faster when you flow the gasoline around the joint. If it DOES, tighten the nuts on the flange and test again. If it STILL leak, fit new gaskets. If it makes NO difference then—
3. If you have an AIR VALVE on the Carburetor, see that it is not sticking partly open all the time. If it is all right then—
4. Examine to see if there is any play in the small shaft that holds the throttle valve in position in the Carburetor. If there is, have Carburetor overhauled by Carburetor Service Station. If it shows no sign of being worn then—
5. Examine the Valve Guides to see that they are not worn badly, so allowing air to be drawn in, making the mixture too weak at low speeds. If there is very much play, you will either have to fit new Valves with oversize stems, or new guides. If, however, the guides are all right then—
6. If you have a Low Speed Needle Valve or Jet, see that it is not blocked. To do this turn the Needle Valve clockwise until the Choker Button pulled out, and the throttle open just about two notches, turn the engine over as fast as possible about ten times. Now turn the adjustment back FOUR TURNS and start the engine. If it is no better then—
7. Remove the Muffler, then take it apart and clean it, or tap it all around with a second hammer, then fully reassemble and race the engine up a few times, when most of the loosened Carbon will be blown out. If this does not make any difference then—
8. Test the Low Speed Carburetor adjustment. First FULLY retard the Spark Lever, close the throttle lever as much as possible. Now turn in the Stop Screw on the carburetor throttle valve until the engine turns slowly, then turn the Low Speed-adjusting Screw in or out until the engine runs smoothly and evenly. If you find that it is impossible to get the engine to run slowly and evenly then—
9. Test the Ignition Timing as shown in article Four, No. 8, to see that it is not too far advanced. If it checks up, all right then—
10. Have the Carburetor and if necessary the Ignition overhauled by the Service Station or makers of car, as the fault is an internal one requiring the skill of an expert mechanic.

NEW TYPE OF CYLINDER HEAD GIVES MOTOR FLEXIBILITY THAT CANNOT BE SECURED WITHOUT IT

Rajo, Head for Motor Gives Car New Life; Adds Speed and Hill-climbing Ability That Is Almost Unbelievable, Says Western Auto Supply

Flexibility—that quality in an automobile engine that will combine the advantages of throttling down to a low rate of travel with quick acceleration—has for years commanded the close attention of automotive engineers. Congestion of traffic, which calls for a slow pace, then rapid movement, emphasizes more and more the need for such a motor. Country roads, as well as condensed traffic, again call for flexibility when the driver wishes to pass the car ahead.

Experimenting with the Ford car to give it increased power, without overheating or

straining the motor has carried mechanical wizards in many directions—some insisted that it is carbonization while others contended that the fault lies in ignition.

Twenty-five years of racing experience and automobile building gave Joe Jagersberger the idea that other channels must be sought in order to overcome these difficulties, and such thoughts resulted in his building a valve-in-head attachment for the Ford car.

This culminating achievement of his years of experimenting has not only created a cylinder head for the Ford which, when attached makes it the most powerful car in the world for its weight, but gives it wonderful flexibility that enables the driver to accelerate his car from 5 to 40 miles per hour within the length of a city block.

Aside from its heightened power and resultant quick pick-up, the Rajo is declared to increase gasoline mileage considerably. Double capacity intake valves, placed in the center of combustion chambers, assures free, unrestricted flow of fresh gas into the cylinder. This design is largely responsible for the marvelous performance of the new Rajo cylinder head. Quicker and easier starting is assured by means of a hot spot that circulates hot air from the exhaust manifold through a jacket around the lower end of the intake pipe, assuring thorough vaporization of gasoline and preventing condensation.

The spark plugs are located on the opposite side of head from valves, making them more accessible and out of the path of the carbon laden exhaust gases.

The Rajo head salesman of the local branch of the Western Auto Supply company, commenting on the new Rajo head as compared with the ordinary type Ford head, says: "The new Rajo head converts a Ford car into the most powerful and efficient car in the world for its weight. It puts any Ford in the same class as Noel Bullock's Rajo equipped Ford that won the world's hill climbing championship on Labor day, 1922, by 'zooming' to the top of Pike's Peak in 19 minutes, 50 and 45 seconds. This new head weighs but 15 pounds more than the stock Ford head, and is about 30 degrees cooler running as the cooling system gives complete water circulation around each overhead valve. With his Ford truck equipped the owner can experience the joy of shooting up the steepest hills in high gear without pounding or heating; of pulling through deep sand or mud with ease; of passing bigger, far more expensive cars on the open road; of having at his command all the power that he will ever need and having under control a wonderful flexibility that will enable him to accelerate from

One of Henry's buggies, equipped with Rajo head. Insert—Western Auto salesman explaining new overhead valve system for Fords

PREPARING AUTO FOR THE HILLS

Here is a dandy running-board cupboard for the auto. If instructions are followed to the letter the resulting feature will be one of most valuable parts of the camping equipment.

"Length about 30 inches, back of front door to rear fender; height, running board to below molding on side of car, about 29 inches; width, 9 1/4 inches; top, 7 1/4 inches to 9 inches. Side away from car has 1 1/2-inch slope outward from top to bottom to keep center of gravity more equal. This box is form fitting as the sides, or ends of box, top and bottom are cut to fit the side of the car and made of 3/8-inch material.

The back is galvanized iron, well nailed to back of box, conforming to form car body. The door is of 1/2-inch material hinged at bottom by 3-inch strap hinges. This door, when let down, forms a table 20 inches square, level with the running board. Table is held horizontal by two legs attached to door with hinges which fold against bottom when not in use, being held by small hooks. Another convenience has been added by not using hinges, but bolting two pieces of shaped sheet steel to bottom of door with hooks on two stove bolts fastened rigidly at either lower corner of box. Two other bolts are similarly placed but about 10 inches higher on the side so that the table may be hooked to these bolts, making a higher table just right for the use of camp chairs. Two extension legs similar to extension camera legs are used to support the table at the outer corners. These legs are carried in box when not in use. The box is provided with three shelves of 1/2-inch material, the top of shelf being just narrow enough to hold several common egg cartons firmly. Another compartment is just right to hold three one-quart fruit jars.

"The entire box is well reinforced with light metal corner plates. A boot is made of canvas or other material to fit over top of box and keep out rain and dust. "By the use of this grab box, the necessity of unloading this and that and the other thing when a

FOR THE LEATHER CLUTCH

When a leather-covered cone clutch sticks badly and becomes hard to release, pour gasoline over it repeatedly, letting it in and out, using any possible means to clean it thoroughly. Then let it dry for several hours and apply neatfoot oil on the leather. Block it out over night so that the pressure from the spring will not squeeze out the oil.

A TIRE TIP

Extreme care should be taken to see that nothing on the car scrapes the tires as they revolve.

PRIMING FLUID FOR COLD WEATHER

A special priming mixture, for use in extremely cold weather, is made of one-half ether and one-half gasoline. This solution makes a powerful explosive mixture that will evaporate at any temperature.

A SUGGESTION FOR DAMAGED THREADS

If the threads of a bolt or stud have been damaged and no dies are at hand to clean them, a little work with a triangular file will often make them as good as new.

OLDSMOBILE STAYS TIGHT AFTER WEAR

The ordinary automobile purchaser when buying a car looks at the outside—possibly the motor—but how many people think of getting under a car and looking at the most important part of it—the framework?

A car may be fine in appearance and give a good demonstration, but does it stay tight in the body? The Oldsmobile has long been recognized as one of the finest-looking cars on the market. Also, it is considered one of the best pullers. A good many people ask how it stays tight and how it holds the tremendous power it has.

To answer that question, Mr. Hunter of the Oldsmobile agency has "up-ended" a current model Oldsmobile, so that one can walk under it and see how it is put together. Mr. Hunter invites the motorists of Glendale in to look at this display, whether or not they have any idea of purchasing a new car. If you have not seen how a carload of automobiles are shipped from the factory, the way this car is braced in the air will give you an idea of how double-deck cars are.

MAKING BUSINESS A PLEASURE

Sixty per cent of the motor vehicles in the United States are used entirely for business.

JAPS LEAD IN EAST

Japan is the leading motor market of the Far East. It leads not only in consumption of motor vehicles, but in potentialities.

YOSEMITE RUN TO OCCUR MAY 18 AND 19

(Continued from Page 1)

tal rules of the run, had made the requirements such that every car entered must be fitted with standard carburetor and ignition system and with standard gasoline tank. In addition, strict attention to minor details relating to standard equipment are always enforced by the officials. The attempt is being made to secure the services of Fred Wagner, world famous race starter, as referee for this year's run, according to Mr. Waters. Through Mr. Stephenson, popular A. A. A. technical representative, it is learned that Mr. Wagner has already expressed his willingness to officiate.

In anticipation of the final decision on the dates of the run just announced, many of the local dealers and distributors have already evidenced their intention of entering cars in the contest. It is reported that some are even pushing their preparation to the extent of tuning up their entries and testing them out on Southern California roads with the view to being well in advance of the actual competition.

SIXTEEN LAST YEAR

There were sixteen entries actually competing in the 1922 event, the competition being divided into five classes, three of four-cylinder cars and two of six-cylinder and eight-cylinder cars. Should the number of classes be increased to six, as is proposed, it is expected that the number of entries in this year's event will easily exceed that of any in economy run history.

With the growing interest in the event on the part of automotive experts and motorists already spreading all over the motorized world, it is freely predicted that the

NEW MOON SPORT IS A THING OF BEAUTY

The new Moon sport model is here, and, by the way, since its arrival it has been receiving all kinds of attention. From the moment it showed its nose in Glendale it has been honored by expressions of surprise and delight. It has made a real hit.

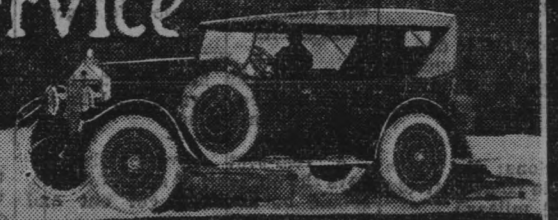

The beauty of the Moon car has long been established, but this is accentuated by the new Moon sport. It demands the instant admiration of the lovers of the sport models.

"The Moon is a thoroughbred from stem to stern." It has nickel head lamps, nickel cowl lamps, nickel windshield, polished aluminum body rail, trunk rack and trunk, six Distel wheels, two mounted at front, khaki top, leather and body in distinctive Moon sport color with two-line stripe, aluminum step plates with rubber pads.

R. W. Runde, 800 East Colorado street, San Fernando valley distributor for the Moon, invites the auto lovers of Glendale to call at his place of business and inspect this new Moon sport.

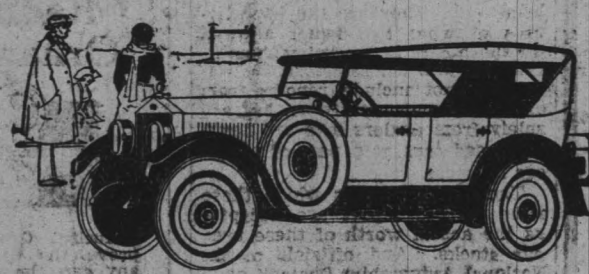

1923 Yosemite economy run will attract an unusual amount of attention. While the adversity of the road conditions varies from year to year, according to the season and weather encountered, the run is always looked upon by both car manufacturer and car buyer as a significant test of each year's improvements in economy of operation and a gauge for future improvements in economy.

The Beauty of the MOON reflects
Power and Efficient Service
